

instrumental in opening up the Web, and making it ready for the future.

On August 16, 2011 Mozilla Firefox 6 was released. The sixth major release of the second most used browser in the world saw many updates around HTML 5, overall stability and security. The Firefox community is geared towards its next major release Firefox 7, which should be released before you read this article in print (Release Roadmap for Firefox 7-https://wiki.mozilla.org/Releases#Firefox_7). Firefox 7 comes with better memory management, a better Web console, and similar nifty enhancements.

Help grow Mozilla

The Mozilla community is a dynamic place to be. The community drives the Mozilla Foundation and its initiatives. The same community also develops and deploys all Mozilla projects. Mozilla India is the home of the Mozilla community in India. The community not only comprises of developers, but also end-users and Web aficionados. There are many ways in which you can be involved with the community; check the community website and contribution areas (refer to the link to know about how you can contribute in the Mozilla India community - <http://www.mozillaindia.org>).

Inviting FOSS experts to write articles on their area of interest

LFY covers a myriad of topics—network management, software development, embedded systems, community issues, and even hands-on guide for newbies. If you've got an interesting topic, let us know. Thanks to the launch of linuxforu.com we are now trying to extend our content portfolio related to Linux & Open Source.

To know more on how to become an LFY author, contact us at

lfyedit@efyindia.com

Few topics that top our list:

- ♦ Tips 'n' Tricks for software developers or IT implementers
- ♦ Cool tweaks for FOSS enthusiasts
- ♦ FOSS on mobile
- ♦ Virtualisation (Implementation)
- ♦ OpenJDK or Java on Linux
- ♦ OpenSolaris (software development)
- ♦ How can I do 'that' on Linux
- ♦ Reviews of latest open source projects & tools
