

OSSCube: Defining Success in the World of Open Source

There are conventional success stories and there are unconventional tales too. The story of OSSCube belongs to the latter category. It has shown how a team of five members can expand to a facility of 300 people in a few years, all sans marketing. Read on to know more...

Vineet Agarwal, co-founder, OSSCube

Year 2006: Two serial entrepreneurs in Delhi-NCR, with already a product success story below their belt and devout unwillingness to join the rate race of 'mega software factory', met to brainstorm – the next big thing...a truly innovative disruption that would be worth their talent and they would commit to making global! They did not have a crystal ball to see the future...all they had was their belief on where technology was headed and the demand was they risk it all and make a huge leap of faith!

Year 2009: They grew and gained experience in the field and decided to expand, both vertically and horizontally. And OSSCube was born—an Open Source Software focused company, providing an integrated value chain of services encompassing outsourced software development, product

customisation and implementation, consulting and training services on open source products and technologies.

Year 2013: The company's operations spread across North America, the UK and India. And the rest, as they say, is history!

OSSCube has been able to make a mark for itself in the world of open source technology in a very short span of time. The beauty of open source is that it comes with unique models and unusual practices. There are no set rules to it. The norm is an out-of-the-box approach and creative thinking. This is the reason why companies like OSSCube are able to carve a niche for themselves.

Elaborating on the team's journey, Vineet Agarwal, co-founder, OSSCube, said, "The company is now a complete open source systems integrator. We are an
