Seagate's new Wireless Plus storage device

In a bid to tap the storage needs of growing mobile device users, Seagate Technology has announced the launch of its Wireless Plus Mobile Storage Device. The company claims that the storage device is capable of wirelessly streaming content for up to eight smartphones or tablets.

This second generation product offers a storage space of 1 TB as against the 500 GB storage offered in its first gen products. This is good enough to carry around 500 HD movies anywhere you want.

The new product from Seagate comes with a 10-hour battery life. The Seagate Wireless Plus mobile storage device can be accessed through the mobile Seagate Media app, which is available for iOS, Android and Kindle Fire HD devices.

Speaking on the occasion of the launch, Futoshi Niizuma, executive director of sales for Japan, South Asia, ASEAN and ANZ, said, "PC growth is flat now and the mobile revolution is in full swing. 2013 will be a significant year for mobile devices, which is an amazing opportunity for us to provide new consumer storage solutions."

The first quad-core tablet from Zync

Zync has become the first to actually launch a quad-core tablet, calling it the Quad 8.0.

The Quad 8.0 is a 20.3-cm (8-inch) tablet that runs on a 1.5GHz processor. Its OS is Android's Jelly Bean and it has a 16 GB internal memory which is expandable to 32 GB. "Zync has been working on these products for some time and we are very excited at the launch. Our Quad 8.0 would be the first ever 20.3 cm (8-inch) tablet in India and comes with the latest features," Ashish Garg, director, Zync Global, said.
