

Postgres Plus Solution Pack

EnterpriseDB's Postgres Plus Solution Pack provides the very best tools available to developers and administrators to make PostgreSQL databases safer, faster, more available, and easier to manage.

Solution Pack Tools

Postgres Enterprise Manager (PEM)

The only solution that allows you to intelligently manage, monitor, and tune large numbers of Postgres database servers enterprise-wide from a single console.

xDB Replication Server

Single master replication integrates data between PostgreSQL and Oracle or Microsoft SQL Server databases helping users to dramatically reduce their license fees with creative applications.

Updates Monitor

Eases your installation maintenance burden by notifying you when updates to any components are available and assists you in downloading and installing them.

SQL/Protect

Protects your PostgreSQL and Advanced Server data against multiple SQL virus injection vectors by automatically learning safe data access patterns and collecting attack data.

Migration Toolkit

Fast, flexible and customized database migration from Oracle, SQL Server, Sybase and MySQL to PostgreSQL and Postgres Plus Advanced Server.

SQL Profiler

A developer's friend to find troubleshoot, and optimize slow running SQL fast! Provides on-demand or scheduled traces that can be sorted, filtered and saved by users and database.
