

NEW PRODUCTS

Now, wireless routers from Intex!

Yes, you heard that right! Intex Technologies, known for bringing out an innovative range of tablets and smartphones, has come out with two new wireless routers. The wireless router portfolio includes the W308R and W316R that delivers wireless speeds up to 300 MBps and 150 MBbps, respectively. The new range of products provides 4x faster wireless speeds and is backward compatible with 802.11b/g devices. With this launch, Intex Technologies is planning to aggressively build its enterprise business by expanding its networking solutions portfolio. "With Internet traffic in India expected to grow six-fold by 2017, we at Intex are anticipating the conditions and catering to the ever rising demand for the Internet by offering innovative networking solutions, especially engineered to control the traffic during peak hours to let users enjoy continued connectivity. We aim to target varied Internet user bases in the country through our product strategy and are aiming for a revenue of Rs 500 million from our networking solutions business this fiscal year," said Vikram Kalia, GM, Product Management, Intex Technologies (India) Ltd.
