

# Notification Examples

[Show Alert](#)

[Show Confirm](#)

[Show Prompt](#)

[Play Beep](#)

[Vibrate](#)

Figure 3: Notifications

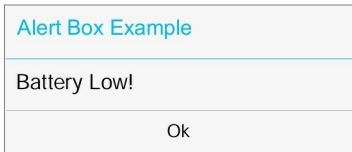

Figure 4: Alert

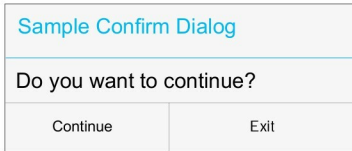

Figure 5: Confirm

So now, let's create a simple notification.html page and put all types of alerts in there to see their usage.

```
// Notification.html
<!DOCTYPE html>
<html>
  <head>
    <title>Notification Example</title>

    <script type="text/javascript" charset="utf-8"
src="cordova-2.7.0.js"></script>
    <script type="text/javascript" charset="utf-8">

      document.addEventListener("deviceready", onDeviceReady,
false);

      function onDeviceReady() {
        // some functionality can be written
      }
    </script>
  </head>
</html>
```

```
function showAlert() {      (1)
  navigator.notification.alert( 'Battery Low!',
alertDismissed, 'Alert Box Example', 'Ok');
}
function alertDismissed() {  (2)
  // do something
}
function showConfirm()      (3)
{
  navigator.notification.confirm('Do you want to
continue?',onConfirm, 'Sample Confirm Dialog','Continue,Exit');
}
function onConfirm()        (4)
{
  alert('Selected Button Index ' + buttonIndex);
}
function showPrompt()       (5)
{
  navigator.notification.prompt( 'Please enter your
name', onPrompt, 'Sample Prompt,['Ok','Exit'] );
}

function onPrompt(results)   (6)
{
  alert("Welcome" + results.input1);
  document.getElementById("enteredName").
innerHTML="Welcome" + " " + results.input1;
}

function playBeep()          (7)
{
  navigator.notification.beep(2);
}

function vibrate()           (8)
{
  navigator.notification.vibrate(5000);
}
</script> </head> <body> <h2> Notification Examples </
h2>
  <p><a href="#" onclick="showAlert(); return false;">Show
Alert</a></p>
  <p><a href="#" onclick="showConfirm(); return false;">Show
Confirm</a></p>
  <p><a href="#" onclick="showPrompt(); return false;">Show
Prompt</a></p>
  <p><a href="#" onclick="playBeep(); return false;">Play
Beep</a></p>
  <p><a href="#" onclick="vibrate(); return
false;">Vibrate</a></p>
</body></html>
```

The output of the above code is shown in Figure 3.

The code shown above will display the corresponding
