Enhance your connectivity with Zebtronics's new dongle

If you always need quick access to the Web, Zebtronics's Sonic 3.5G USB dongle, can be a good buy. Top Notch Infotronics, which owns the famous Zebtronics brand, has introduced its first anywhere-anytime connectivity device. The dongle accepts a standard SIM card of any service provider, allowing users to access the Internet at high speeds of up to 7.2 MBps through its built-in 3.5 G HSDPA USB modem feature.

The Zebtronics Sonic USB Dongle works on all 2G/3G networks making it simple for users to swap SIM cards while travelling, selecting service providers of their choice. A simple plug-and-play device, the dongle is supported on major operating systems like Windows 2000/XP/Vista/7/8 and Mac OS, without the need for installation or a software CD. Useful value added features include support for voice calls and provision for a microSD card (adding memory up to 16 GB).

Rajesh Doshi, co-founder and director, Purchase and Marketing at Top Notch Infotronics, shares, "The Sonic dongle is our first offering in the vast mobile broadband wireless Internet device market. We are confident that the features and value it offers will appeal to businessmen, students, home users, and travellers—anyone who wants simple wire-free connectivity with the freedom to work with data SIM cards from any operator."
