NIMHANS Convention Center

BENGALURU

A Techie's Delight!

Open Source India 2013, Asia's largest open source convention, turned out to be a platform for open source technology to grow and flourish. The three-day event (November 11-13, 2013), popularly known as OSI Days 2013, was full of action for FOSS enthusiasts. There were discussions, interactions and hands-on workshops that engaged and involved industry head honchos, IT professionals and aspiring techies. The platform not only proved to be a reunion for FOSS enthusiasts, but also helped in fuelling several fruitful technical discussions. Quite a few start-ups and even established brands like Atul Ltd and Just Dial turned up at OSI Days 2013 to discuss their open source implementations. Open Source India 2013 concluded on a positive note, promising to be back next year, packed with much more power and increased involvement from the community. Here's a pictorial tour of all that happened at OSI Days 2013. Have a dekho:

OSI Days 2013 Fact Sheet

A big thank you to all our advisors and speakers for making the event a grand success

Foss enthusiasts making a beeline at the registration counter

"It is always exciting to be a part of OSI Days and this year was no exception. The technology sessions were highly informative with some of the experts sharing their insights on a range of topics including mobile application development, the kernel and the cloud. I feel the conference proved to be a great opportunity to engage with technology enthusiasts from all over the country ranging from app developers and open source contributors to the students."

—Mandar Naik, director, Platform Strategy, Microsoft

"Our team was struggling with an issue that it encountered while running Windows virtual machines on the Zen cloud. We were trying to fix this for over a year but we couldn't get a perfect solution. I brought this issue up with Dr KY Srinivasan, principal architect, Windows Server and Cloud Division, Microsoft, when I met him at OSI Days 2013 and he suggested a possible solution within minutes."

—Dr Rajeev Papneja, COO, ESDS Software Solution Pvt Ltd

"My company is an open source technology implementor. This event was a great help in understanding newer technologies and their business side too. My team could interact with the industry and community head honchos and explore some worthwhile future technology plans."

—Balaranjith T, General Manager-IT, Atul Ltd

"OpenStack is a bigger project in India, than what I had perceived before coming to OSI Days 2013. It is impressive and will surely have me coming to the event next year as well. I have attended various sessions of the event. The best part is that these sessions are highly technical and involving. The interactions between the speaker and the audience facilitate the growth and development of ideas and technology."

—Tristan Goode, Board Director, OpenStack Foundation

"This is my second year of participation at Open Source India. It is an interesting event where we get the right kind of audiences to interact with. I have thoroughly enjoyed being there at the show."

—Lux Rao, CTO- Technology Services, HP India Sales
