

Openfiler vs FreeNAS

	Openfiler	FreeNAS
Use	Openfiler is an OS that provides file-based network-attached storage and block-based storage area network.	FreeNAS is a free and open source software network-attached storage (NAS) system based on FreeBSD and the ZFS file system.
License	It is free software licensed under the GNU General Public License version 2.	It is licensed under the terms of the BSD License.
Stable release	2.3	9.1.1-RELEASE / 27 August 2013
OS	Linux	FreeBSD
Platform	i386/AMD64	i386/IA-32 and x86-64
Protocols supported	NFS, SMB/CIFS, HTTP/WebDAV, FTP and iSCSI	CIFS, AFP, NFS, iSCSI, SSH, rsync and FTP/TFTP

installation, 2 GB or higher of RAM, separate storage volumes/disks for data export, 1 GB Ethernet network interface, and a hardware RAID controller.

For VMware virtualisation installation, you will need a 64-bit VMware hypervisor, VMware Player, VMware Server, VMware ESX compatible, Symbios or Buslogic virtual SCSI disk driver, an IDE virtual disk driver, 2 GB minimum virtual RAM, and a virtual network interface.

Xen/parallels specifications are: a 64-bit hypervisor/ VMM; raw, LVM, or virtual block device, 2 GB minimum virtual RAM, and a virtual network interface.

Figure 3 is the first screen of the installation. The complete installation process is available at <http://www.openfiler.com/learn/how-to/graphical-installation>.

A step-by-step text-based installation of Openfiler is given at <http://www.openfiler.com/learn/how-to/text-based-installation>
