

A List of Training Providers in the Field of Programming Languages

Aspire GATE | Bengaluru

The institute has set out to educate and train candidates in major IT technologies like Web designing, Web 2.0, PHP, software testing, Oracle, JAVA, C, C++, etc. Its software training division ensures quality in all technologies. Apart from quality training in IT courses, the institute also provides students with real-time experience in handling tough situations during work and software execution. It also offers confidence-building sessions, interview preparation, etc. The institute claims that once the training of the students is completed at its centre, it provides them with interview calls.

CegonSoft | Bengaluru

The training division of Cegonsoft offers specialised software courses in Java/J2EE, software testing, PHP, MySQL, LAMP, Python, Web 2.0 and RIA, which are in sync with the IT and software industry's requirements. According to sources at the firm, lectures in the classrooms are supplemented by actual projects and hands-on experience, presented by technical staff. These involve presentations by students that are held at regular intervals to improve managerial communication and soft skills. The institute claims that it has successfully trained more than 50,000 professionals.

DUCAT India | Noida

The institute offers training in all programming languages. The training at DUCAT is provided by a team of trainers who have master's and post-graduate qualifications in order to impart the best training. They are conversant with the latest industry knowledge, which helps to enhance the quality of the training imparted at the institute. DUCAT not only imparts training, but also organises regular campus interviews involving various market leaders from the tech space. The company claims that students get selected at these campus interviews even before passing out, because the recruiters have faith in the training imparted by DUCAT.

GRRAS Linux Training and Development Centre | Jaipur

GRRAS offers training and certification on PHP, MySQL, Java, Shell Scripting, Perl, Android, robotics and many other streams. The training centre offers courses for working professionals based on their
