

YOU SAID IT

On screenshots/images of OSFY articles

It feels good being one of the authors of your esteemed magazine and I have plans to contribute many more articles to OSFY. Thank you for offering me a platform to share my knowledge on open source and Linux. I want to know what are the print specifications (dimensions, resolution, format, etc) that will ensure the high quality that is expected by the print department of OSFY. I really do not want to compromise on this aspect. Hence please give me the details.

ED: We are indeed pleased to know that you wish to contribute more content to our magazine. Let us know what topic you would wish to write on and do send us the ToC of your proposed article. According to our design and layout team, a good picture should not be less than 300 dots per inch (dpi), the resolution should not be less than 1500 x 1500 pixels, and the images need to be in jpg, tiff or format.

A wishlist of articles

As an avid reader of www.linuxforu.com, I would love to read about the following topics and I think other readers might like to as well.

1. Remote monitoring systems to cut down the costs of supervision
2. Telosb sensors - the latest revolution in sensor technology
3. Energy-efficient products - an important part of industrial growth

Let me know if you are interested, as I already know your blogging style. Besides, I understand what your readers love as I am one. Look forward to hearing from you.

ED: Thanks a lot for getting in touch with us and sharing your interests with us. It's indeed nice to know that you are an avid follower of our website. The topics that you suggested are good, though keeping in mind our target audience, we focus solely on open source related articles. Your mail also indicates that you would love to contribute content for us and we are happy to hear that. Please ensure that you focus on the open source

angle here. Before writing for us, you can send us the detailed Table of Contents (ToC) for the topic you want to write on. Our team will review it and once they give you the thumbs up, you can go ahead with the article. However, currently, we do not have the option of paying an honorarium for online articles.

A section on job opportunities?

I have a suggestion for the OSFY team. It would be great if you start a section on job opportunities in the FOSS domain. I am sure this will be beneficial for freshers as well as for those who have experience. I also feel that this will give a boost to your magazine's sales.

—Praveen KLP;
klpraveen@gmail.com

ED: Thanks a lot for sharing your suggestion. It is our constant endeavour to match the expectations of our readers. We agree with you, which is why we do publish a page on FOSS jobs in every edition of Open Source For You. We also come out with career-related content in our magazine. We hope that this will be of help to you. Keep reading OSFY and feel free to continue sending us your feedback.

Contributing content for OSFY

I have recently completed my Masters in business, entrepreneurship and technology from the University of Waterloo in Canada. I am an open source enthusiast and have spent years in the IT industry. I am also a community moderator and an author with opensource.com, a Red Hat Inc supported online publication. I blog at aseemsharma.info. I would like to write for your website, so do let me know how I could go about it.

—Aseem Sharma,

ED: It's great that you reached out to us on our website and indicated your interest on contributing content for our magazine. We are always looking for enthusiastic authors who wish to write for us. Before you do so, you can send us the detailed Table of Contents (ToC) for the topic you want to write on to osfyedit@efyindia.com. Our team will review it and once they give you the go-ahead, you can work on the article. I would like to mention that, currently, we do not have an option of paying an honorarium for online articles.
