Optimise your Internet speed with Edimax 3G routers

Wish to enhance your Internet speed? Edimax 3G routers can be a good bet. Edimax Technology, a leading provider of advanced network communication products, has recently announced the growing demand for its universal data card supported 3G routers. These routers are compatible with all the data cards present in the market despite the ISPs they belong to.

Edimax' 3G - 6408n, the latest model launched, supposedly stands out as the best 3G router in its segment. It supports both 3G/3.75G and cable/xDSL modems.

With a 300 MBps Wi-Fi speed, the Edimax 3G-6408n router is a high-speed solution that complies with IEEE 802.11b/g/n standards. The latest wireless MIMO (multiple-input and multiple-output) technology is built into this router to broaden its Wi-Fi coverage and to eliminate dead spots within the signal range.

Eric Yang, country manager, India, at Edimax Technology said, "We are thankful to all Indian consumers and channel partners for contributing to the achievement of the highest sales of Edimax 3G -6408n, which is the best among all our routers. With the increasing demand, we look forward to adding better, more feature-rich products to meet the increasing needs of the customer."
