

Enhance your music experience with Portronics Bluetooth speakers

All those who have an ear for music will be thrilled to hear that Portronics, one of the emerging pioneers in innovative, portable and digital devices, has launched its new version of the wireless stereo Bluetooth speaker—Pure Sound BT. This speaker delivers full stereo sound, enabling you to revel in the music on your Bluetooth enabled devices with the freedom of wireless connectivity. You don't need to don your ear phones while you listen to your favourite music on your mobile phone, tablet, MP3 player, etc.

Despite its compact size, the Pure Sound BT speaker brings soaring highs and deep, booming, bass to every room in the house. You can ideally have a distance of 10m between the mobile phone and the speaker. Pure Sound BT is powered by a pair of proprietary and highly sophisticated acoustic drivers, unmatched in their ability to produce extreme high and low frequencies from stereo speakers.

Shares Jasmeet Sethi, director, Portronics, "Pure Sound BT is a perfect blend of awesome performance, great features, and ease of use. It is also the perfect integration of technology and utility, giving you the ideal music gadget you would love to have."
