

YOU SAID IT

'OSFY boosts my knowledge bank'

I am a regular reader of *OSFY*. Despite having no computer background, I could learn on a trial and error basis about Linux through the Internet and other free sources. Today, I use only Linux, especially the Ubuntu distro. I must admit that *OSFY* played the biggest role in boosting my knowledge on Linux. The magazine's very crisp and lucid style is its USP.

In your April 2013 issue, I read the article, 'Getting Started with an Open Source Circuit Simulator' by Vineeth Kartha. I loved it and would like to thank the author for sharing such an informative piece.

The article also explains how to install QUCS. Readers with a limited knowledge of the command line may not be able to install it. The important thing is the incorporation of the repository, which may be difficult through the command line. There are chances of getting an output like 'Command not found'. So here's how I did it.

I opened the USC and went to **EDIT > Software Centres > Other Software > Add...**

I then entered the APT line "ppa:fransschreuder1/qucs" > **Add Source > Closed**.

Then I reloaded the Ubuntu software centre to confirm it was loaded. I then opened the terminal (Ctrl + Alt + T) and applied the following:

```
sudo apt-get update
sudo apt-get install qucs
```

The QUCS was installed successfully.

As I sign off, I would like to congratulate you for bringing out a wonderful magazine for open source lovers.

I learnt the basics of Linux from OSFY

I am a professor at SIT Mangalore and a regular subscriber to *OSFY*. I take this opportunity to let you know that *OSFY* played a major role in helping me understand the basics of Linux and open source. Apart from that, some of the developers' articles, along with the code snippets, helped me in executing and installing software that I required. Thanks a lot for publishing such informative articles in your magazine. I hope *OSFY* will cater to an even wider audience in the days to come. All the best!

ED: Thanks a lot for the feedback. It feels great when readers tell us how they benefited from our magazine. We cherish our readers' views and with every edition, we try to evolve into a better product. And your comments help us do that even better. Yes, there is a lot of demand for developers' articles. Keep sending us your suggestions and feel free to get in touch with us at osfyedit@efyindia.com in case of any query.

The content in the e-zine should be different

The e-zine is a great service to subscribe to. However, I feel that most users on the portal have already subscribed to the magazine. It would be great if you come up with articles and forums that have not been covered in the print edition. I am sure this will benefit the readers immensely.

ED: Interesting feedback. However, the purpose of the e-zine is to provide you and other subscribers an archival facility to store all issues subscribed by you, as well as allow you to access them where-ever you are. We do publish extra content on our Web portal: www.linuxforu.com. Take a look and share your views with us. **END**
