

Figure 2: VM configuration

Note: You can always add more hard disks to your VM after it's created.

Once you have created the VM, you are now ready to power it on. A sample final configuration is shown in Figure 2. Power on your VM by clicking the 'Start' icon. Once started, you will need to choose **Devices > CD / DVD Devices > Choose a virtual CD / DVD disk file**. Here, browse for the Windows 2008 R2 ISO file downloaded earlier. Once selected, go back to your VM and press **Right Ctrl+H** to reset your VM, and you should see the Windows 2008 R2 Server welcome screen, as shown in Figure 3.

In a similar way, you can create Linux and Windows VMs using your VirtualBox set-up. Simply select the correct OS type and version from the wizard, create a hard disk, allocate

Figure 3: Windows installer screen

RAM and CPU resources, and power on the virtual machine!

That's it for now. Stay tuned for more such tutorials and articles! **END**
