

ED: Thanks! It's great to hear that the article was inspiring. The story definitely couldn't have happened without the valuable inputs of the LUG members and our Facebook community. We aim to reach out to more members of both the communities and come up with more such articles in future editions.

A career in programming

I have been reading OSFY since last year and I like the content. I would really appreciate it if you let me know what the actual use of Python is as a programming language. As per my understanding, it is generally used for developing games. Please tell me more about this topic. I am planning to make a career in programming. Can you suggest any courses?

An issue on Raspberry Pi

Harshdeep Sokhey: A request. Can we have a complete edition dedicated to Raspberry Pi? That would be great! Raspberry Pi has been generating a buzz in the last one year. So it will be great if we could have a complete edition dedicated to it.

Open Source For You: Thanks a lot for the suggestion. We agree that Raspberry Pi is definitely the rage these days. Though we may not dedicate a complete edition to it, we have featured a number of articles on it in our previous editions.

ED: Thanks a lot for writing to us and letting us know that you love reading OSFY. If you wish to have a detailed insight into Python, you can refer to <http://www.python.org/>. You will find everything you wish to know about it. Hope this helps. We cover a lot of career-related topics in our magazine and you can go through them. With respect to programming as a career, you can have a look at our October 2012 issue, in which we covered careers in PHP, which is again a sought-after terrain.

Stop the extra packaging of OSFY

Prasad Cholakkottil: I have been a regular reader of your magazine for several years now. I have a request—please stop using the extra plastic cover that you started shipping with the magazine since the last issue. It took a whole minute for me to get the magazine out of the packing. The tapes are messy. Why not keep things simple? I am not going to stop reading the magazine, though! I appreciate all your efforts and it's a great magazine to subscribe to. Keep up the good work!

Open Source For You: Hi Prasad, we are happy to know that you like reading OSFY and find the content interesting. Thanks a lot for the compliment. The extra packaging is a temporary move to reach out to those who are not aware of OSFY. We are doing this in an attempt to build a wider OSFY community.
