

A List Of Mobile (Android) Apps Development Providers

AppStudioz | Noida

With the successful launch of more than 700 applications, AppStudioz has a proven track record of meeting stringent deadlines and delivering cost-effective solutions that do not compromise on performance. AppStudioz's expertise has been demonstrated in several out-of-the-box augmented reality solutions, as well as a range of apps for education, audio/video, location, 2D and 3D games, healthcare and social networking.

DI Webtech | Gurgaon

DI Webtech is a leading Android apps development company that has been catering to its customers since 2004. DI uses the open source Android platform to build custom-based apps. As Android is an open source software stack for mobile devices, backed by Google, DI develops business and customised apps based on this open platform so that industry players can't restrict or control the innovation. The company plays the role of a technology and business advisor to its clients and recommends the Android platform for mobile apps, as it provides the best solution in terms of usability, ease of long-term maintenance and ROI.

Divum | Bengaluru

Divum has designed and developed over 100 highly interactive Android applications for its global clientele. Its vast experience and strong domain expertise will ensure its clients' business needs are met. The company has found it rewarding to harness the true potential of Google Play for its visibility and reach, which covers over 200 million active Android users.

E-Zest Solutions | Pune

E-Zest specialises in working with the Android development kit, making use of the Java Programming language and running in a virtual machine or on a custom Linux kernel. Android is a multi-tasking and multi-threaded environment, so developers have significant control over things like an application's appearance and ultimate capabilities. E-Zest has a big pool of Android specialists who can start working on client projects, on-demand, instantly. These developers are competent in Android development and work closely with clients at every stage.

Intelgain | Mumbai

Intelgain is a technology solutions company that provides enterprise mobility solutions and software product engineering services around open source and Microsoft platforms for multiple business verticals. The company has delivered several mobile apps on Android as well as for the iPhone/iPad, enabling greater value addition to businesses worldwide, thereby resulting in greater ROI for their investments.

Kellton Tech Solutions | Gurgaon

The company is a global IT organisation offering customised IT services and solutions for the mobility, Web, ERP, security and the cloud domain. Kellton Tech's Android Studio strives to deliver Android-based mobile apps with novel functionality and unmatched performance, all packed within an artistic framework. The company's competence and expertise in all areas of Android application development, right from conceptualisation, UI and creative development to quality assurance, maintenance and support, helps it provide its customers with wonderful apps that utilise the full strength of the Android platform.
