

Special mention: Kelton Tech has delivered customised Android-based mobile applications for a wide variety of industry segments including retail, e-commerce, media and publishing, education, lifestyle and market research.

Kelton considers itself one of the pioneers in the use of novel technologies like location-based services, augmented reality and geo tagging in the field of Android app development.

Did you know? Kelton's app for one of India's largest organisations in the e-learning segment is the first of its kind to offer online smart classrooms on Android-based tablets. It has also developed Android apps for one of India's best and most-used travel portals and India's biggest movie exhibition chain.
