

The same Apple MacBook Pro hardware was used for testing both the operating systems with Intel integrated graphics. The Apple MacBook Pro used for benchmark testing was powered by an Intel Core i5 520M processor, 4 GB RAM, 120 GB OCZ Agility 2 SSD, and Intel 'Ironlake' IGP graphics.

The fact that Ubuntu 13.04 performs better than Apple OS X on devices like Apple MacBook Pro is clearly an indication that the open-source Linux based operating system has enough juice to out-run the best in the business.

Google Play brings the 'Movies' to India

Google Play has a piece of good news for movie buffs in India. After rolling out the Google Play Books store, the search-engine giant has launched yet another Google Play product—Google Play Movies. This allows users to rent and download English as well as Hindi movies in the country via Google Play. Besides renting movies, one can also purchase them directly from the store. In terms of pricing, movie renting starts around Rs 75 for SD quality and Rs 120 for HD. And to purchase a movie, the lowest prices are around Rs 180 for SD and Rs 490 for HD.

Currently, it appears that there are more English than Hindi movies. It is expected that Google India will be in talks with Indian production houses to get the required rights to make more Hindi movies available on Google Play.

With the launch of both e-books and movies on Google Play, the only other products Indian Android users cannot access yet are music, magazines and TV shows.

Richard Stallman calls Ubuntu Linux 'spyware'

Richard Stallman, the author of the GNU General Public License (GPL), as well as the founder and president of the Free Software Foundation, has told a South American free software association, FLISOL, not to promote Ubuntu Linux at its events. He reasoned it out by saying that Ubuntu Linux "...spies on its users" by collating users' desktop search activity and selling it to Amazon. This came up because Canonical had released Ubuntu 12.10 last year with Amazon search integrated into its Dash desktop search function.

Richard Stallman
founder and president,
Free Software
Foundation

While Canonical says that users are free to opt out of this feature, and that it also makes users' search information anonymous before sending it to Amazon, the fact that Ubuntu users are shown Amazon ads in response to desktop search queries is something that has not gone down too well with many.

RHCA

(Red Hat Certified Architect)

ASSURED Exam Dates @ IPSR

**Winner of
Best
Red Hat
Certified
Training Partner
Award
2011-12**
(India, Bangladesh, Sri Lanka & Nepal)

Produced the
Highest number of
Red Hat
professionals
in the World

RHCA RHCDS RHCSS RHCVA RHCE

**Modules Starting
Every Week**

Awards

- ▶ Winner of Red Hat International Award 2008, 2009, 2010, 2011 & 2012
- ▶ Winner of Red Hat GLS National Awards 2004, 05, 06, 07 & 08

Faculty & Infrastructure

- ▶ 27 member faculty crew led by RHCE, RHCVA, RHCSS, RHCDS certified professionals
- ▶ Global standard infrastructure offered at our International Centre located in Kochi

Achievements

- ▶ Produced 5000+ Red Hat professionals
