

Arush Salil: I want an alternate less weight solution for Network Manager Daemon, to control my network connection needs. What can be my options?

Like · comment

Utsav Rana: Use NMAP or Wireshark.

Anandhu Chirayil: Go for system-network-configuration.

Gaurav Joshi: Go for WICD.

Arunesh Dutta: Can you recommend some good certifications in computer science which meet the industry needs?

Like · comment

Yhal Htet Aung: OCP, CCNA, MCP.

Balamurugan Subramaniam: For networking - RHCE & RHCSA.

Akshay Kharat: For networking, you can go for CCNA, Cloud Computing/cloud security related certifications and for software related stuff, you can go for software testing, any language certification (java, c/c++, vb, web designing).

Jeykrishnan Janardhanan: What's the best Antivirus for an Android mobile?

Like · comment

Anand Kethavarapu: You may try this - BitLocker partition under Linux using Dislocker, an open source driver which is using FUSE (or not): <http://www.hsc.fr/ressources/outils/dislocker/download/>. You also need bitlocker password to view contents. Good luck!

Nethaaji Suntharakumar: Norton security.

Utsav Rana: Avast antivirus. I always keep it updated, it detects the virus and removes it. I recommend you to install it and make a backup copy of this antivirus app.

Jeykrishnan Janardhanan: How about QuickHeal? Has anyone used it?

Utsav Rana: Yes, I have used QuickHeal after I purchased my smartphone, but it runs trial version on my mobile. Another version of QuickHeal for desktop PC that I have installed is not supported. I am using Windows 7 HB. So I installed Avast on my Desktop, Laptop and mobile.

Christopher D'Souza: Try Avast as it's the most downloaded one and it's free. It has a web shield and much more to explore!

EAGLET GATEWAYS TO SOFTWARE NETWORKING & EDUCATION SOLUTION Pvt. Ltd.

We are emerging software development company and training institute situated in the heart of Pune City

Training Division

■ Eaglet Linux System and Kernel Programming Track

- Intel Assembly Programming on Linux and Protected Mode features of Intel Processor
- Advanced C [ANSI C + GNU C extensions]
- Linux System Programming
- Linux Kernel Internals and Device Drivers

We are official training partners of Red Hat, Novell and EC-council. We offer following courses

■ Network Administration Courses

- Cisco Certified Network Administrator (CCNA)
- Cisco Certified Network Professional (CCNP)
- Cisco Certified Internetwork Expert (CCIE)

■ Linux Administration Courses

- Red Hat Certified System Administrator. (RHCSA)
- Red Hat Certified Engineer. (RHCE)
- Red Hat Enterprise Virtualization.
- Linux Troubleshooting

■ Network Security Courses

- Certified Ethical Hacker (CEH)
- Computer Hacking Forensic Investigation (CHFI)
- Licensed Penetration Tester (LPT)
- EC-Council Certified Security Analyst (ECSA)
- Certified Network Defense Architect (CND)

Salient Features

- Commitment towards doing off-beat and product oriented work in core areas such as system development, openGL, etc.
- Maximum use of open-source technologies.
- Very experienced and committed staff and cooperative front team.
- Situated at the heart of Pune city, with 3500 sq. ft. floor spanned across two floors.

Development Division

- We have separate Research and Development lab equipped with state-of-the-art infrastructure and facilities.
- Currently, RnD department is working on our own customized Linux distribution and GPU computing.
