

Dear Partners,

It gives me an immense pride to bring you to the newly launched India's Small & Mid-Size (SMB) Website. It is appropriately named as "Just Right IT". The Link to the website is www.hp.com/in/justrightit

HP EG Business has launched this website to help our partners and SMB Customers to have a simplified view of the technological solutions that HP prescribes for SMB Customers at different stages of their IT evolution and to cater to the differing sizes of IT setup that the customers are looking for. Seventy-two percent of our SMB customers feel that technology should be simplified for them so that they can take quick and right decisions and chose the right combination of products and technologies that work seamlessly. This is exactly what this website endeavours to achieve.

We have divided the customer sizes to five predefined levels, viz. 10, 20, 50, 100 and 200 seat IT set-ups, and also divided their IT evolution stages into four stages, viz. Starting out, Building momentum, Gaining efficiency and Expanding business.

Thus there are 5 sizes x 4 Stages = 20 possible SMB combinations, and for each combination HP is proposing a solution incorporating Server, Storage, Networking and Technology Services that is best suited based on HP's long standing experience of supporting SMBs across the country. SMBs can take these standard bundles to market with special pricing and shorten their sales cycle. This should also help the sales force of the SMBs to get conversant with these bundles and position them accordingly.

Overall, this website should help the Indian partner community to cater to SMBs across India with immense confidence on right technology solutions, with special prices offered upfront so that they have a much shorter sales to delivery cycle. So what are you waiting for? Log on to www.hp.com/in/justrightit and get started.

I would also look forward to any feedback you may want to share on improvements we can make to

Warm Regards,
Pradeep Khemani
