

now scale to multiple terabytes of data, and a new compression algorithm, LZO, speeds the creation of dump files, leading to reduced down time during crash dump generation and faster troubleshooting.”

The kernel dump file is the outcome of a crash where the kernel wrote everything in memory to a file on the disk. In order to have a several terabyte dump file, the user must first have several terabytes of memory.

Mercury browser arrives for Android

Mercury, which is considered one of the best third-party Web browsers on the iOS platform, has now arrived on Google Play Store for Android users. The app is free of cost. It looks like a regular browser but has some impressive features that can pit it against some known names in the field. For example, if you are using multiple tabs, the browser will help you switch between them simply by swiping left and right with two fingers. Additionally, the browser comes with plugins for Adblock, Translate, Dropbox, Wi-Fi File Transfer, Light-out mode and Reader. It gives Reader a clean interface. However, it does not have plugins for Lastpass or Pocket, as of now—something that is present in its iOS version.

Amazon updates Android app, adds support for India

The updated version of the Amazon shopping app was made available on the Google Play Store today. According to reports, the updated version has support for shopping from India, which means that Amazon.in now plays a role in it. Indian shoppers can now use the official app to shop from Amazon directly through their mobile phones.

Amit Agarwal, vice president and country manager of Amazon India, said, “We are excited to further enhance the customer shopping experience. Customers in India can now use the Amazon app to conveniently shop with confidence from anywhere, all while enjoying the Amazon shopping experience, right from their Android phones.”

Further, the updated application also has notifications, which tell users about their saved and subscribed orders. In addition, the notifications cater to the Gold Box Deal of the Day. There are also a few improvements to the performance of the application.

Amazon.com, Amazon.co.uk and other international stores of Amazon can also be accessed by users in order to widen their scope for shopping. The new update to the Amazon application also includes bug fixes to the app.

IBM launches big data lab

Technology giant, IBM, has launched a research lab for big data applications. Dubbed the Accelerated Discovery Lab (ADL), the facility aims to find ways to use big data for various purposes. Big data is one of the mainstays of the technological world today, and the ADL has been developed to specifically find connections between these huge sets of data and then use it for analytical purposes.

According to reports, the technology giant is currently focusing on variety, veracity, volume and velocity. Venture Beat quoted Laura Haas, director of technology and operations at the ADL, “There’s a set of data challenges and a lot of different expertise you need to tackle those problems. Everyone is talking about big data and analytics. We talked to our researchers, but it’s still really hard to get the right kind of insight out of the data.”

The laboratory will be set up at the IBM Almaden Research Center in San Jose, California. The company is trying to provide help to those customers who understand the importance of big data but need help in working with it. Michelle Zhou, who was recently in the news for finding out how to comment on a person’s personality based on 200 of their tweets, is amongst the team of researchers at IBM’s lab.

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
