

## A peek into the hands-on workshops at OSI Days 2013

**1. Hello Drupal: Build a great digital experience in three hours.**

Learn how you can assemble a powerful website in just a few hours using Drupal.

*Facilitator: Jacob Singh | regional director - India | Acquia*

**2. Securing Your Cloud Infra**

There are a number of security concerns associated with cloud computing that are faced by both cloud providers and their customers. Attend the workshop to learn more about this evolving security domain.

*Facilitator: Dibya Prakash | founder | ECD Zone*

**3. MySQL Replication and GTIDs**

Learn the new developments in MySQL replications and how to make replication crash-safe.

*Facilitator: Nitin Mehta | MySQL principal sales consultant*

**4. Best Practices of MySQL Performance Tuning in the MySQL 5.6 Era**

This session covers the basics of performance tuning, the key parameters of MySQL Server, the important steps to tune SQL statements, useful tools, utilities and new technologies of MySQL 5.6 for performance tuning.

*Facilitator: Ryusuke Kajiyama | MySQL pre-sales consulting manager | Asia Pacific and Japan | Oracle*

For updated details on the workshops, log on to [www.osidays.com](http://www.osidays.com)

**5. Android App Testing for Business Applications**

The diversity in mobile computing environments presents unique challenges in application development, quality assurance and deployment -- requiring unique testing strategies. Attend this workshop to learn the art of app testing.

*Facilitator: Dibya Prakash, founder, ECD Zone*

**6. Developing Games in HTML5 for the Web and Mobile**

The three-hour workshop is intended for basic and intermediate level developers, and covers the essentials needed to start creating 2D browser-based games with JavaScript using HTML5 Canvas.

*Facilitator: I S N Pradeep | founder and director | CGManifest | India*

**7. Build your Personal Cloud with OpenStack/DevStack**

This workshop will introduce the technical components of OpenStack, so you will get a chance to get hands-on with the OpenStack API and dashboard.

*Facilitator: Kavitha Munshi | CTO | EVP Aptira India*

**8. Android Application Development**

The workshop will introduce the basics of Android Application Development and will make sure that the attendees become skilled enough to develop an Android application of their own.

*Facilitator: Code Instruct, a division of Skyfi Labs*

Venkatesh Swaminathan from Attachmate, who will speak on an interesting topic, 'When Will the Cloud Rain Dollars, Dollars, Dollars...' shares, "We are happy to be a part of Open Source India as we have been associated with FOSS for the last 21 years. This forum will give enterprises an insight into alternatives in the open source domain and help them understand how FOSS gives them the flexibility to scale their ventures."

**Listen to some of the real open source success stories:**

Yes, you heard that right. For the first time ever, Open Source India will have companies narrating their stories on how open source technology helped them scale their ventures and enhance their business' profitability. Cleartrip.com and Atul Ltd (a Rs 2.2 billion chemical company that charted its way to success through the open source route) will be among those who are ready to share their open source journeys. So, be there to understand how you too can explore innovations and maximise your business' productivity through the open source route.

**Experience hands-on learning:** You get a chance to delve deeper into the latest trends in the open source arena through a varied range of workshops at the event. For all those who wish to learn the basics of HTML5-based game development, the art of Android app testing, securing or creating your own cloud, etc, there is a workshop for you. If you are a Drupal fan, you will be in for a treat, as you get to attend a workshop that tells you how to create digital content

on Drupal in just three hours. So, be there at this event to learn the tips and tricks and stay ahead of your peers.

**Collaborate, network, share and celebrate the true spirit of FOSS**

Yes, Open Source India gives you the platform to share and seek expertise, network and form new connections. What's more, you get an opportunity to meet the people you want to and discover ways to give back to the open source community.

The mega convention will also see big names like Microsoft, VMware, Oracle, Novell and C-DAC making their presence felt. Mandar Naik, director, Platform Strategy at Microsoft, shares, "Advances in the cloud technologies and platforms today are providing tremendous flexibility to enterprises in how they invest in the future, either in an on-premise, on-the-cloud or hybrid strategy. For Microsoft, this change has also been about strengthening our partnership with the open source communities that we have been working on for the past few years. As an example, making Linux images for various distributions, both free and commercial, on our Azure platform has been a key priority for us and through the past two years, this is a reality that our customers have welcomed. Through the Windows Store for both Windows 8 and Windows Phone 8, we have been able to create opportunities for millions of open source developers worldwide to bring their ideas and apps to the fore with our
