

Sanjay Shiradwade: Hi friends today I purchased OSFY magazine and with this edition got the Fedora 19 installation DVD for free. My question is I used all Windows OSs but not Linux and right now I have installed Windows 8 in C:/ and want to install fedora 19 in D. Please let me know how to install and how to use this OS. Thank you.

Anand Kethavarapu: You can shrink D: using Disk Management option under Computer Management to make around 20-25 GB free partition and reboot with DVD to proceed installation. (Remember selecting option as using inside side by of Windows partition option).

Praveen Klp: How To bypass blocked website sites in Linux OS? Is there any tool?

Riya Patankar: Use proxy servers, there are many on net.

Rachuri Lokesh: How to access a directory present in the linux server through FTP as a multiple users?

Like · comment

Chinthu RS: First install and configure FTP. The package is VSFTPD and restart the VSFTPD service. Then connect to FTP server in terminal as `$ftp <ip addr of server>`.

Akshay Tiwari: If your #FTP #Server is configured with multiple-user access, try using `ftp <I.Pof Server>` in terminal. Else configure #FTP to share directories with proper user permissions given like Enabling #chroot environment and mentioning the users in `/etc/vsftpd/chroot_list` file

For #Fedora

`http://www.server-world.info/en/note?os=Fedora_17&p=ftp`

For #Ubuntu

`https://help.ubuntu.com/10.04/serverguide/ftp-server.html`

Start the service, try FTP and you are done.

Chinthu RS: Or do it graphically by using "connect to server" option.

EAGLET GATEWAYS TO SOFTWARE NETWORKING & EDUCATION SOLUTION Pvt. Ltd.

We are emerging software development company and training institute situated in the heart of Pune City

Training Division

■ Eaglet Linux System and Kernel Programming Track

- Intel Assembly Programming on Linux and Protected Mode features of Intel Processor
- Advanced C (ANSI C+ GNU C extensions)
- Linux System Programming
- Linux Kernel Internals and Device Drivers

We are official training partners of Red Hat, Novell and EC-council. We offer following courses

■ Network Administration Courses

- Cisco Certified Network Administrator (CCNA)
- Cisco Certified Network Professional (CCNP)
- Cisco Certified Internetwork Expert (CCIE)

■ Linux Administration Courses

- Red Hat Certified System Administrator. (RHCSA)
- Red Hat Certified Engineer. (RHCE)
- Red Hat Enterprise Virtualization.
- Linux Troubleshooting

■ Network Security Courses

- Certified Ethical Hacker (CEH)
- Computer Hacking Forensic Investigation (CHFI)
- Licensed Penetration Tester (LPT)
- EC-Council Certified Security Analyst (ECSA)
- Certified Network Defense Architect (CND)

Salient Features

- Commitment towards doing off-beat and product oriented work in core areas such as system development, openGL, etc.
- Maximum use of open-source technologies.
- Very experienced and committed staff and cooperative front team.
- Situated at the heart of Pune city, with 3500 sq. ft. floor spanned across two floors.

Development Division

- We have separate Research and Development lab equipped with state-of-the-art infrastructure and facilities.
- Currently, RnD department is working on our own customized Linux distribution and GPU computing.
