

A List of Key Players in Android Smartphones

Celkon Mobiles | Hyderabad

Celkon's product portfolio includes more than 100 models today, ranging from feature-rich, dual SIM phones and marathon battery phones, to 3G Android smartphones and tablets. Celkon Mobiles is evolving as a brand with technologically advanced products and a clear focus on the growing market for smartphones. Celkon has the Signature series of mid-range smartphones and the Campus series of entry level smartphones. In the coming months, the company plans to launch a slew of new smartphones at various price points. The company has a presence in more than 300 districts through 50,000 retail outlets in India, and it is planning to go international by the end of this financial year.

Champion India | New Delhi

Champion India has a range of products that include tablets, smartphones, feature phones, netbooks, storage gadgets and other components and accessories. The company aims to give its customers a superior user experience with the latest technology at a reasonable price. Champion has entered into a strategic alliance with BSNL to address the various connectivity issues, and the phones come with a free BSNL SIM and many other attractive bundled offers. Being an avid open source supporter, the company intends to use advanced open source technologies along with Android and become an active part of the community.

HTC India | Gurgaon

HTC is leading the way in creating innovative mobile technology that revolves around how you and your employees live and work. By putting people at the centre of everything it does, HTC pushes the boundaries of design and technology to create innovative and personal experiences for consumers around the globe. HTC's portfolio includes smartphones and tablets powered by the HTC Sense user experience. A focus on product design with performance, endurance, craftsmanship, as well as intuitive tools and interfaces, ensures an elegant experience in a beautiful, minimalist package.

Huawei India | Gurgaon

Huawei's portfolio has three different device categories – smartphones, tablets and data cards. To help differentiate its smartphones, Huawei has come up with its 'Emotion UI'. This is a Huawei-developed, Android-based man-machine interaction system for smart terminals. With Emotion UI, everything is easy to find, easy to enjoy, and easy to share. The company has recently introduced The Huawei Club, a global consumer-centric initiative to strongly connect with its user communities across the globe. The company has launched the India chapter of the Huawei Club in Bengaluru. Members can benefit from the Huawei Club by experiencing the latest Huawei range of smartphones, tablets, and interact with technology experts, developers, etc.

Intex Technologies | New Delhi

The company's business segments cover a portfolio of 29 product groups spread across 250 items including mobile phones, multimedia speakers, desktops, LED/LCD TVs, CRT screens, DVD players, computer UPS systems, cabinets, headphones, Web cameras, data cards, security software (anti-virus), to name just a few. It has a pan-India presence through its own network of 30 branches and more than 700 service touch points.

The company has a centre for design and development in Delhi, which is well-equipped with modern facilities and is headed by highly qualified engineers looking after product development, and product and component specifications.
