

Karbonn Mobiles | New Delhi

Understanding consumer requirements and offering the best-in-class products at a great value-for-money proposition has, today, established Karbonn amongst the top mobile vendors in the smartphones category based on a recent IDC report. On the other hand, it has also been recognized as the second fastest growing mobile brand in India as per a recent study conducted by Voice & Data. With more than 85,000 outlets Karbonn reaches out to people across the length and breadth of the country, enhancing its penetration and reach. The brand has achieved a distribution footprint of over 90% coverage of the districts for Karbonn with more than 20 million devices sold in a very short span.

Lava Mobiles | New Delhi

LAVA has a wide product portfolio that encompasses tablets, feature phones and smart phones having various models in bar and touch form factor. Lava's gamut of brands includes IRIS series of Android based smartphones, IRIS PRO series of premium smartphones, Discover series of Internet experience touch phones, Spark series of premium bar phones and ARC & KKT series of feature-rich budget phones. Lava has a complete in-house R&D set-up in India that converts consumers' needs and insights into products using in-depth R&D & testing, thus bringing in products that offer superior value through good quality and best-in-class features at an affordable price.

Lenovo India | Bengaluru

The company's offerings are based on consumer needs and their usage habits. Lenovo's smartphone portfolio offers four different choices to the consumers—the K, S, P and A Series. The K Series is targeted at people who are looking for products that offer the latest technology and are high on performance. The S Series offers sleek, ergonomically designed multimedia phones for entertainment while on-the-go. The P Series is for users who are constantly on the move and are looking for an extended battery life. And finally, the A Series is for active Internet and social media users, and first-time smartphone users.

Micromax | Gurgaon

Micromax is one of India's leading consumer technology companies offering products like mobile phones, tablets, data cards and LED televisions. Micromax strives to meet the aspirational needs of potential customers. With an in-depth understanding of rapidly changing consumer preferences, coupled with the use of advanced technologies and correct pricing, Micromax has been able to differentiate itself from its competitors through constant innovation and design. Its smartphone range, Canvas, has been a trendsetter in the Indian smartphone market. The company focuses on creating categories of products for various segments of people and offers innovations at an affordable price. This has helped Micromax gain an edge over its competitors.

Samsung India | Gurgaon

Samsung Electronics Co Ltd is a global leader in technology, opening new possibilities for people everywhere. As a leader in innovation, the company is always the first to launch the most innovative features in the Indian market, which provides it with the first mover advantage that helps it stay ahead of the rest. The company's approach of offering mobile devices with different features helps provide its customers with more choice—in terms of handsets ranging from the entry level to high-end smartphones, prices, applications and the platform that suits their needs. What sets it apart from its competitors is the quality that it offers across all categories of devices. Through relentless innovation and discovery the company is also transforming the worlds of televisions, personal computers, printers, cameras, home appliances, LTE systems, medical devices, semiconductors and LED solutions.

Sony India | New Delhi

Sony is bringing out the best on its smartphones with technologies like BRAVIA Engine 2, Cyber-Shot and the Walkman app. Sony has a built-in app with pre-programmed remote functions for all major TV brands. It also
