

Jeeson Raphael: Which is the best OS for beginners?

Like · comment

Shantha Kumar OS: = Linux and Distribution goes like this, Mint => Ubuntu => Fedora => CrunchBang => Debian => Arch => Slax => Gentoo => LFS.

Vadiraj Joish: Ubuntu Linux is probably the most beginner friendly on the market. Close second would be Mint.

Tom Wickline OS: Linux, distribution = Ubuntu or Mint, after a couple years move to Gentoo and FreeBSD.

Suriya Prakash: Windows people can go screw themselves.

Cyrus Hernandez: Just for beginners Windows OS is probably okay for that, the fact is Windows are more widely used for all masses.. but if you engage to the next level, Linux will put you on the business market level.

Mukhtar Khan: For beginners, Windows is the best OS.

Yhal Htet Aung: Ubuntu is the best

Nanja Siddiqui: Ubuntu will be fine for beginners.

Aziz Mdom: Xubuntu or Mint

Mickael Faure: Linux, to have the good habits, naturally.

Utsav Rana: I just got a Belkin N150 WiFi router cum modem. I configured it on Windows 7 laptop, and it worked fine. Now do I need to re-configure it again in Ubuntu 13.04 using the steps given in the modem manual? I have a Tata Indicom wired broad band connection (for both laptop & desktop) and a desktop with Ubuntu 13.04 on it. How do I set it up for the desktop?

Riya Patankar: Just plug in your ethernet cable and start browsing, no need to reconfigure.

Akshay Tiwari: You could use your WiFi credentials to use internet over Ubuntu or just plug a ethernet port as Riya said. If you want to re-configure the router, you use web based login to router with a ethernet connection with the default IP 192.168.2.1.

EAGLET GATEWAYS TO SOFTWARE NETWORKING & EDUCATION SOLUTION Pvt. Ltd.

We are emerging software development company and training institute situated in the heart of Pune City

Training Division

■ Eaglet Linux System and Kernel Programming Track

- Intel Assembly Programming on Linux and Protected Mode features of Intel Processor
- Advanced C (ANSI C+ GNU C extensions)
- Linux System Programming
- Linux Kernel Internals and Device Drivers

We are official training partners of Red Hat, Novell and EC-council. We offer following courses

■ Network Administration Courses

- Cisco Certified Network Administrator (CCNA)
- Cisco Certified Network Professional (CCNP)
- Cisco Certified Internetwork Expert (CCIE)

■ Linux Administration Courses

- Red Hat Certified System Administrator. (RHCSA)
- Red Hat Certified Engineer. (RHCE)
- Red Hat Enterprise Virtualization.
- Linux Troubleshooting

■ Network Security Courses

- Certified Ethical Hacker (CEH)
- Computer Hacking Forensic Investigation (CHFI)
- Licensed Penetration Tester (LPT)
- EC-Council Certified Security Analyst (ECSA)
- Certified Network Defense Architect (CNDA)

Salient Features

- Commitment towards doing off-beat and product oriented work in core areas such as system development, openGL, etc.
- Maximum use of open-source technologies.
- Very experienced and committed staff and cooperative front team.
- Situated at the heart of Pune city, with 3500 sq. ft. floor spanned across two floors.

Development Division

- We have separate Research and Development lab equipped with state-of-the-art infrastructure and facilities.
- Currently, RnD department is working on our own customized Linux distribution and GPU computing.
