

=VLOOKUP(A2,\$NSE_MARKET_DATA.\$A\$1:\$N\$753, 6,0)

The lookup table is locked-in using dollar characters (\$NSE_MARKET_DATA.\$A\$1:\$N\$753). The A column

contains the stock ID. After I specify the formula as shown above, the LTP price of the stock will be copied from the lookup table in the NSE_MARKET_DATA worksheet and displayed in the current worksheet.

Figure 3 shows the main worksheet; the stock symbol is in the A2 cell. The VLOOKUP formula is in the D2 cell. In the worksheet containing the lookup table, the value being looked up is in the first column and the value being copied
