WORKDIR /etc/goss/

CMD ["dgoss", "-h"]

```

Now, let's see dgoss in action by running the following command in your terminal:

```

docker run -it --rm -v ${PWD}:/etc/goss:ro -v /var/run/
docker.sock:/var/run/docker.sock:ro -e GOSS_SLEEP=2 -e
GOSS_FILES_STRATEGY=cp -e GOSS_OPTS='--color -format tap'
dgoss:0.4.9 dgoss run dgoss:0.4.9 sleep infinity.

```

You should see the output shown in Figure 3.

```
