The output report provides a list of the detected plugins and their observed values:

Detected Plugins:

[HTTPServer]

HTTP server header string. This plugin also attempts to identify the operating system from the server header.

```
String      : gws (from server string)
```

[RedirectLocation]

HTTP Server string location. used with http-status 301 and

302

```
String      : http://www.google.com/ (from location)
```

[UncommonHeaders]

Uncommon HTTP server headers. The blacklist includes all the standard headers and many non standard but common ones.

Interesting but fairly common headers should have their own

plugins, eg. x-powered-by, server and x-aspnet-version. Info about headers can be found at www.http-stats.com

```
String      : content-security-policy-report-only (from
headers)
```

HTTP headers

The HTTP header options and values are also provided in the report:

[X-Frame-Options]

This plugin retrieves the X-Frame-Options value from the HTTP header. - More Info:

```
http://msdn.microsoft.com/en-us/library/
cc288472%28VS.85%29.
aspx
```

```
String      : SAMEORIGIN
```

[X-XSS-Protection]

This plugin retrieves the X-XSS-Protection value from the

HTTP header. - More Info:

```
http://msdn.microsoft.com/en-us/library/
cc288472%28VS.85%29.
aspx
```

```
String      : 0
```
