

Step 2: Change the permission:

```
chmod +x jx
```

Step 3: Move it to the `bin` folder in `/usr/local`:

```
sudo mv jx /usr/local/bin
```

Step 4: Check for the version:

```
jx version
```

Octant UI

Jenkins X's OSS web UI is called

Octant. Our top recommendation for an open source online user interface (UI) for utilising Jenkins X is Octant in combination with the `octant-jx` plugin.

This is because it's:

- Extendable using Go or TypeScript/JavaScript plugins.
- Allows for visualisation and management of all Kubernetes and custom resources across clusters.
- Octant-jx provides a seamless interface with Jenkins X components, including apps, environments, pipelines, and repositories.

Jenkins X offers a comprehensive set of development and operations functionalities accessible through the UI using `octant-jx`. You can:

- Scrutinise applications, environments, pipelines, and repositories.
 - Swiftly navigate to a pipeline, accessing details such as pods, logs, pull requests, or 'preview environment'.
 - View intricate step details and logs for each step in the process.
- Additionally, a management UI for Jenkins installation, upgrades,

The screenshot shows the Octant UI interface. The left sidebar contains navigation options: Applications, Namespace Overview, Workloads, Discovery and Load Balancing, Overview, Horizontal Pod Autoscalers, Ingresses, Services, Network Policies, Config and Storage, Custom Resources, RBAC, and Events. The main content area displays a table of source repositories for Jenkins X projects.

Name	Labels	URL	Description	Age
dev	gitops.jenkins-x.io/...	https://github.com/prarthanaus0597/gitops.git	the git repository for the Dev environment	17d
prarthanaus0597-gitops	gitops.jenkins-x.io/pipeline/namespaces	https://github.com/prarthanaus0597/gitops	<not found>	32m
prarthanaus0597-https-github-com-prarthanaus0597-scientific-calculator	gitops.jenkins-x.io/...	https://github.com/prarthanaus0597/https-github-com-prarthanaus0597-scientific_calculator	<not found>	32m
prarthanaus0597-php-helloworld	gitops.jenkins-x.io/...	https://github.com/prarthanaus0597/php-helloworld	<not found>	15d

Figure 7: Source repositories of projects involved in JX

The screenshot shows the Octant UI interface with the 'Discovery and Load Balancing' section selected. The main content area displays a table of ingress resources.

Name	Labels	Hosts	Address	Ports	Age
bucketrepo	gitops.jenkins-x.io/pipeline/namespaces	bucketrepo-jx.192.168.49.2.nip.io	192.168.49.2	80	17d
docker-registry	app.docker-registry chart.docker-registry-2.2.2	docker-registry-jx.192.168.49.2.nip.io	192.168.49.2	80	17d
hook	gitops.jenkins-x.io/pipeline/namespaces	9688-103-156-19-229.ngrok.io	192.168.49.2	80	17d
jx-pipelines-visualizer	app.kubernetes.io/instance:jx-pipelines-visualizer app.kubernetes.io/managed-by:Helm	dashboard-jx.192.168.49.2.nip.io	192.168.49.2	80	17d
