

You can also execute R code in an Emacs Org Babel code block. The following needs to be added to your Emacs configuration file:

```
(org-babel-do-load-languages
 'org-babel-load-languages
 '((emacs-lisp . t)
  (R . t)))
```

Consider the given code snippet in an Emacs Org file. When you use `C-c C-c` in the code block, it will execute the commands in an R environment and produce the result:

```
#+BEGIN_SRC R
sqrt(2)
#+END_SRC
#+RESULTS:
: 1.4142135623731
```

Usage

On Parabola GNU/Linux-libre, open a terminal and type 'R' at the shell prompt to invoke the R interpreter as shown below:

```
$ R
R version 4.0.4 (2021-02-15) -- "Lost Library Book"
Copyright (C) 2021 The R Foundation for Statistical Computing
Platform: x86_64-pc-linux-gnu (64-bit)
```

R is free software and comes with ABSOLUTELY NO WARRANTY. You are welcome to redistribute it under certain conditions. Type `license()` or `licence()` for distribution details.

Natural language support but running in an English locale

R is a collaborative project with many contributors. Type `'contributors()'` for more information and `'citation()'` on how to cite R or R packages in publications.

Type `demo()` for some demos, `help()` for on-line help, or `help.start()` for an HTML browser interface to help. Type `'q()'` to quit R.

```
>
```

You can type `q()` at the prompt to exit from the session. It will then ask you if you would like to save the workspace image and you can either press `y` or `n`.

```
> q()
Save workspace image? [y/n/c]: n
$
```

You can obtain the version of R that is installed from the terminal prompt using the `R --version` command, as shown below:

```
$ R --version
R version 4.0.4 (2021-02-15) -- "Lost Library Book"
Copyright (C) 2021 The R Foundation for Statistical Computing
Platform: x86_64-pc-linux-gnu (64-bit)
```

R is free software and comes with ABSOLUTELY NO WARRANTY. You are welcome to redistribute it under the terms of the GNU General Public License versions 2 or 3. For more information about these matters see <https://www.gnu.org/licenses/>.

If you are at the R prompt, you can obtain the version information with the `'version'` built-in as follows:

```
> version

platform      _
arch           x86_64-pc-linux-gnu
arch           x86_64
os             linux-gnu
system        x86_64, linux-gnu
status
major          4
minor          0.4
year           2021
month          02
day            15
svn rev        80002
language       R
version.string R version 4.0.4 (2021-02-15)
nickname       Lost Library Book
```

There is also built-in help documentation that you can use with the `'help'` function as mentioned below:

```
> help()
help           package:utils           R
Documentation
```

```
Documentation
```

```
Description:
```

`'help'` is the primary interface to the help systems.

```
Usage:
```

```
help(topic, package = NULL, lib.loc = NULL,
      verbose = getOption("verbose"),
```
