

Syntax	Description	Example(s)
<code>rpm -ivh {rpm-file}</code>	Installs the package.	<code>rpm -ivh mozilla-mail-1.7.5-17.i586.rpm</code> <code>rpm -ivh --test mozilla-mail-1.7.5-17.i586.rpm</code>
<code>rpm -Uvh {rpm-file}</code>	Upgrades the package.	<code>rpm -Uvh mozilla-mail-1.7.6-12.i586.rpm</code> <code>rpm -Uvh --test mozilla-mail-1.7.6-12.i586.rpm</code>
<code>rpm -ev {package}</code>	Erases/removes an installed package.	<code>rpm -ev mozilla-mail</code>
<code>rpm -ev --nodeps {package}</code>	Erases/removes an installed package without checking for dependencies.	<code>rpm -ev --nodeps mozilla-mail</code>
<code>rpm -qa</code>	Displays list of all installed packages.	<code>rpm -qa</code> <code>rpm -qa less</code>
<code>rpm -qi {package}</code>	Displays installed information along with package version and short description.	<code>rpm -qi mozilla-mail</code>
<code>rpm -qf {/path/to/file}</code>	Finds out what package a file belongs to, i.e., finds what package owns the file.	<code>rpm -qf /etc/passwd</code> <code>rpm -qf /bin/bash</code>
<code>rpm -qc {package-name}</code>	Displays a list of configuration file(s) for a package.	<code>rpm -qc httpd</code>
<code>rpm -qcf {/path/to/file}</code>	Displays a list of configuration files for a command.	<code>rpm -qcf /usr/X11R6/bin/xeyes</code>
<code>rpm -qa --last</code>	Displays a list of all recently installed RPMs.	<code>rpm -qa --last</code> <code>rpm -qa --last less</code>
<code>rpm -qpR {rpm-file}</code> <code>rpm -qR {package}</code>	Finds out what dependencies a rpm file has.	<code>rpm -qpR mediawiki-1.4rc1-4.i586.rpm</code> <code>rpm -qR bash</code>

Table 5: Syntax, description and examples of rpm

Install Snap on Ubuntu	<code>\$ sudo apt update && sudo apt install snapd</code>
Install Snap on Red Hat based distributions	<code>#yum install epel-release</code> <code>#yum install snapd</code> <code>#systemctl enable --now snapd.socket</code> <code>#ln -s /var/lib/snapd/snap /snap</code>
Install packages	<code>#snap install package</code>
Remove packages	<code>#snap remove package</code>
Update packages	<code>#snap refresh</code>
Find packages	<code>#snap find package_query</code>
List installed packages	<code>#snap list</code>
Information for a package	<code>#snap info package</code>

Table 6: The syntax of Snap
