General options

Remote volume size: 50 MByte

This option does not relate to your maximum backup or file size, nor does it affect deduplication rates. [See this page before you change the remote volume size.](#)

Backup retention: Custom backup retention

7D:1D,2W:1W,36M:1M

Enter a retention strategy manually. Placeholders are D/W/Y for days/weeks/years and U for unlimited. The syntax is: 7D:1D,4W:1W,36M:1M. This example keeps one backup for each of the next 7 days, one for each of the next 4 weeks, and one for each of the next 36 months. This can also be written as 1W:1D,1M:1W,3Y:1M.

Figure 10: Restore from backup

Your files and folders have been restored successfully.

Did we help save your files? If so, please consider supporting Duplicati with a donation. We suggest 10€ for private use and 100€ for commercial use.

We accept donations via different services, such as OpenCollective, PayPal, BountySource and various crypto currencies.

OK

Figure 11: Restored successfully

If you choose to restore to the original location, you can specify what Duplicati should do with files that already exist — overwrite them or restore to a new file with a time stamp in the file name.

Clicking the *Restore* button will start the actual restore operation. After the operation has been completed, Duplicati will notify you.

Now, let's check the *my pics* folder. The images have been restored.

Congrats! You have successfully installed your backup and recovery system with Duplicati.

Overall, Duplicati has numerous customisable features that can make your life a lot easier. It offers great performance and allows you to back up files to your cloud storage service or remote file server without any hassle. **END** 🐧
