

Figure 4: Choose *Open* to start the PuTTY session

Figure 5: Security alert dialogue box for connection permission

- Ensure that the port value is 22.
- Under *Connection type*, select *SSH*.
- C. In the *Category* menu, expand *Connection*, expand *SSH*, and then choose *Auth*. Complete the following:
 - Choose *Browse*.
 - Select the *.ppk* file that you generated for your key pair and choose *Open*.
- D. If this is the first time you have connected to this instance, PuTTY displays a security alert dialogue box that asks whether you trust the host to which you are connecting. Choose *Yes*. A window opens, and you are connected to your instance. The Windows system is now connected to the Linux instance running on the Amazon EC2 cloud server. **END** 🐧
