

JFrog launches free subscription for multi-cloud DevOps platform

JFrog has announced the general availability of a free subscription of its universal, hybrid and multi-cloud DevOps platform, including industry-leading DevSecOps capabilities offered at no cost. The company's platform is used by some of the largest enterprises in the world to streamline and accelerate their delivery.

Available on all major public cloud providers—AWS, Microsoft Azure, and Google Cloud Platform—and across 18 cloud regions, the free subscription of the JFrog platform includes the following.

JFrog Artifactory: This is a universal software package (binary) management solution and enterprise container registry in one, supporting more than 26 technologies.

JFrog Xray: This enables DevSecOps with the SaaS solution for OSS vulnerability scanning. Paid subscriptions also include OSS licence compliance, and additional and advanced security capabilities powered by VulnDB.

JFrog Pipelines: This is a next-generation CI/CD solution for both traditional and cloud-native applications. Users receive free access to the critical building blocks for enterprise-grade end-to-end DevOps, with up to 2GB storage, 10GB monthly data transfer, and 2,000 CI/CD pipeline minutes per month.

Open Invention Network announces continued expansion of its Linux System definition

Open Invention Network (OIN) has announced that it has further reduced patent risk associated with core Linux and adjacent open source code through the measured expansion of its Linux System definition. Open Invention Network periodically revises its Linux System coverage to include core code drawn from the increasing number of important open source projects.

Keith Bergelt, CEO of Open Invention Network, said, "Linux and open source software proliferation accelerates the pace of innovation across industries as software becomes an

MariaDB Corporation appoints Amir Ameri as chief financial officer

MariaDB Corporation has announced the appointment of Amir Ameri as chief financial officer and Paul Jenkinson as board member and audit committee chair. MariaDB SkySQL delivers a full-featured MariaDB cloud experience for production workloads.

The cloud database market is the fastest-growing segment of the overall 55 billion dollar database market. It is growing at 68 per cent compared to 32 per cent on-premise growth.

Michael Howard, CEO at MariaDB Corporation, said, "I'm excited to bring Amir Ameri and Paul Jenkinson on board to serve critical roles in our financial operations supporting our rapidly growing cloud business. Amir has a strong background in growing SaaS companies, and he'll validate we have the financial process in place for our next phase of business growth. We've also formed a new audit committee that will be led by Paul to ensure we are living up to the highest financial integrity standards followed by public companies, preparing us for our next chapter."

Amir is an accomplished financial professional with more than 25 years of leadership experience in finance and management. He has held executive positions at several SaaS and enterprise technology companies, including CollabNet VersionOne, Precise Software, and EnergyConnect. He earned an MBA in finance and management from Stanford School of Business and a bachelor's degree in economics from Stanford University.
