

addition, it enables learning experiences to be extended and customised using community-sourced plugins (<https://moodle.org/plugins>) so that additional features can be integrated in the learning management system. These plugins provide the extra modules and activities that are required by the organisation depending on their scalability including attendance register, video chat, Skype, live streaming, LaTeX formatting, flowchart creation, audio recording, and so on.

Regardless of whether the user of Moodle is an administrator, course designer, instructor or learner, Moodle LMS is user-friendly. Even course creators or teachers who are not from an engineering background can work on Moodle LMS with ease, without any technical complexities.

Online platforms for teaching, learning, and corporate meetings are the need of the hour. The cloud platforms discussed above can help to meet this need with ease, and should be deployed by educational institutions. **END** 🐧
