

Jenkins 2.0 and later versions have built-in support for delivery pipelines.

A few important Jenkins commands

Description	Command
Restart Jenkins	<code>http://localhost:8080/jenkins/restart</code>
Shut down Jenkins	<code>http://localhost:8080/jenkins/exit</code>
Start Jenkins	<code>java -jar jenkins.war</code>
Change the port	<code>java -jar jenkins.war --http-Port=9999</code>

Blue Ocean is becoming very popular in creating declarative pipelines; however, YAML pipelines are being incubated and the community is looking forward to these.

Docker

A container can package application code, libraries and configurations. The container engine is installed on the host OS.

Docker characteristics

Open source	Yes
Licence	Apache License 2.0
Type	OS-level virtualisation, containers
Written in language(s)	Go
Operating system supported	Linux, Windows, macOS
Stable release	19.03.14
Website	https://hub.docker.com/
Companies and projects that use Docker	Trivago, Pinterest, Twitter, Spotify, Microsoft, Medium.com, Coursera

Docker comes in two flavours — Docker Community Edition and Docker Enterprise Edition.

Pull rate limits for certain users are being introduced to Docker Hub starting November 2nd. [Learn more](#)
