

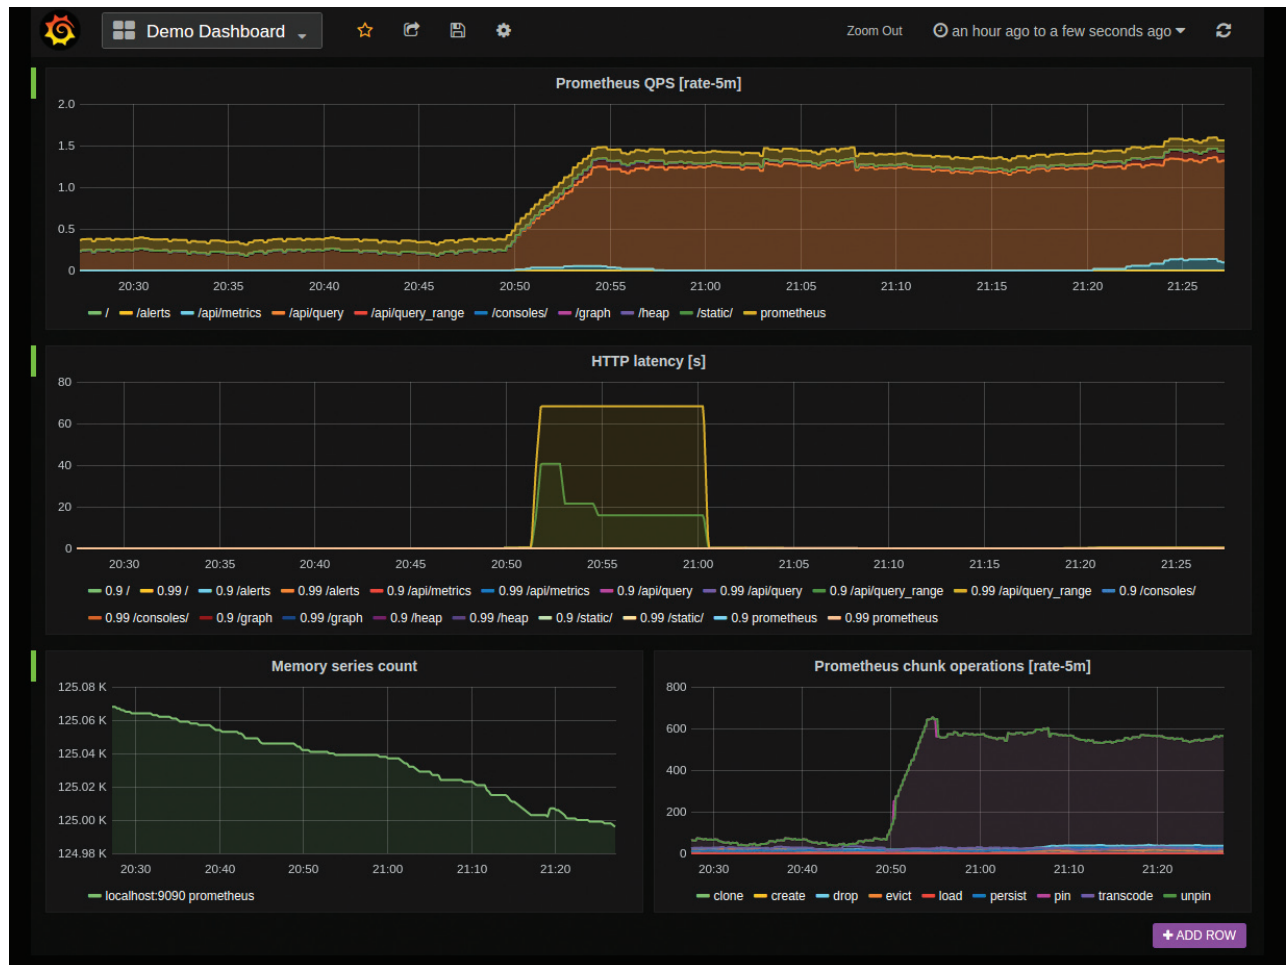

Figure 6: Grafana support (Reference: <https://prometheus.io/docs/visualization/grafana/>)

Prometheus

Prometheus is an open source tool used for monitoring and alerting systems. The Prometheus ecosystem has components such as Prometheus server, client libraries, a push gateway, exporters for services, an alert manager, and support tools. Features include a multi-dimensional data model, a flexible query language, and multiple modes of graph and dashboard support.

Prometheus characteristics

Open source	Yes
Licence	Apache License 2.0
Type	Monitoring
Written in language(s)	Go
Operating system supported	Cross-platform
Stable release	v2.22.0
Website	https://prometheus.io/
Companies and projects that use Prometheus	DigitalOcean, Just-Watch, GrafanaLabs

Grafana supports the querying of Prometheus. The Grafana data source for Prometheus has been included since the release of Grafana 2.5.0. **END** 🐧
