

HoneyBook

This app is offered by HoneyBook Inc. and helps maintain your business efficiently. It helps in getting the right client and can reply to questions quickly, send professional invoices, contracts, quotes and brochures. This app can manage your clients and helps grow your business. HoneyBook can help you run your business seamlessly and stay organised from anywhere. You'll be able to access client details, get notifications and respond, send invoices and use templates from anywhere from your mobile device.

The main features of this app are:

- Manage your client dashboard from anywhere and manage the client data in one place.
- Send messages and files to clients using personalised templates including invoices, contracts, emails, brochures and questionnaires.
- Send mobile-friendly invoices to clients and get your payment faster. Payments are safe and secure with 24/7 fraud monitoring.
- Get instant notifications about the client's enquiries, messages and payments. You can check your availability and schedule without leaving the app, and also review your tasks.

Dynamics 365

Offered by Microsoft Corporation, this enterprise app is an essential business solution for busy professionals who need to engage with customers and be productive while on the go. With this app, one can arrive prepared for every appointment and update notes, tasks and attachments – along with the relevant service and sales records – while the details are still fresh. This app provides sales people, agents and supervisors with the best tools for managing and updating their data, either online or offline. Dynamics 365 can be deployed on any Android device seamlessly with the minimum configuration.

The main features of this app are:

- New look and compact layout with stacked elements, optimised to give essential information at a glance.
- The workspace and personalised action hub gives you the provision to do common tasks quickly.
- Has an enhanced note-taking feature, and seamless access to camera and other device capabilities.
- Give offline access with synchronisation, so that you can work on the go.
- Access your activities, accounts, contacts and leads from an easy-to-use home page.
- Has guided contextual business processes.
- Helps track progress for key performance indicators visually with charts.

- Access your personalised views of lists and grids so that you see the data most important to you.

Genbook

This app is offered by Genbook Inc., and helps to instantly book appointments with the businesses you need, conveniently. You can book or pay for various local services too, right from your Android phone. Genbook helps you with your appointments on the go, and can choose the time that's right for you, at your convenience, 24/7.

The main features of this app are:

- Book appointments from the 'Favourites' list at any time.
- Easy viewing of the updated business details, services and prices.
- Get real-time availability and instant confirmation.
- Booking history and upcoming appointments can be managed.
- Reschedule, rebook or cancel with convenience.
- Nearby businesses can be discovered and booked easily.
- Verified customer reviews and ratings can be checked.

Zoho One

Offered by Zoho Corporation Business, this suite of apps helps to manage your business on your mobile device. It has all the comprehensive apps for your business and has centralised administrative control from one single console. This app helps you gain control of almost every business need including recruitment, launching your website, marketing your product, catering to customers, and so on. All permissions across the business data, such as user management, email hosting, mail management and security policies can be accessed by the administrators and owners of Zoho One. This app is now also available to all the Zoho One users in an organisation.

The main features of this app are:

- Offers admin privileges like add a user, assign apps and roles, formulate security policies, create groups, etc, from your mobile device.
- Get real-time notifications for reset password, assign apps, etc, from the users in your organisation immediately.
- Personalisation options such as creating a customised email address for all your employees and personalising their accounts.
- Launch all your apps within the suite with just a single tap, request access to the apps you need from the admin, and also discover apps that can be installed.
- Search all your data across Zoho apps without any hassle and work with other Zoho apps too. Find all the needed information and narrow down your search results with fine filters to find relevant information without switching between apps.
