

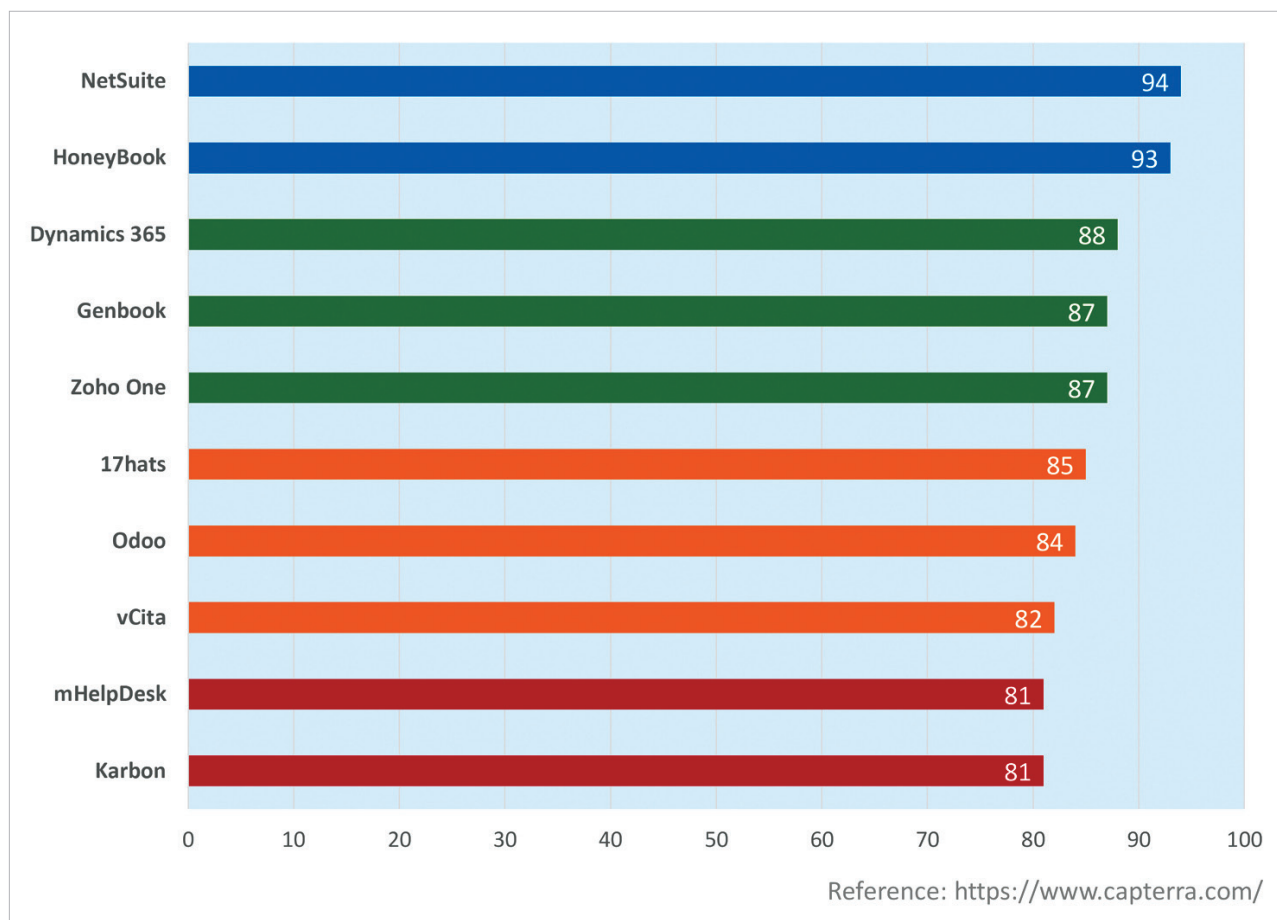

Figure 2: App score chart

- Communication between office and field staff is seamless. Data is updated automatically so that everyone is on the same page.

Karbon

This app is offered by KarbonHQ and provides a truly collaborative platform for accounting firms to manage workflows, communicate with teams and deliver exceptional client work — from anywhere. It's embedded in your workflow, so your team can estimate work and track the time right where the work happens. It lets you confidently scope work, automate data collection, scale client onboarding, anticipate bottlenecks and automate recurring work for the future. The communication is in one place, so you know your team members have everything they need to get started and see where every job stands to ensure accountability across teams. Karbon can analyse team performance, improve inefficient processes, identify your best clients, and help in future planning to improve profitability.

The main features of this app are:

- Discuss work with your team directly through emails, notes and tasks at hand.
- Transform emails into personal tasks or delegate them to your team.
- Assign notes, tasks, email and work to colleagues.
- Swipe and clear items that are not required.
- Identify what's important using a low-priority filter.

Among the ten apps listed here, NetSuite, HoneyBook and Dynamics 365 seem to be the best apps from the point of view of performance and features. But you can use any app from this list as per your business need. These Android apps, rated by Capterra, can be considered for business use, but there may be some other Android app out there that may also suit your business requirement. So search around a bit before you finally settle on the app you feel is right for your business. **END** 🐧
