

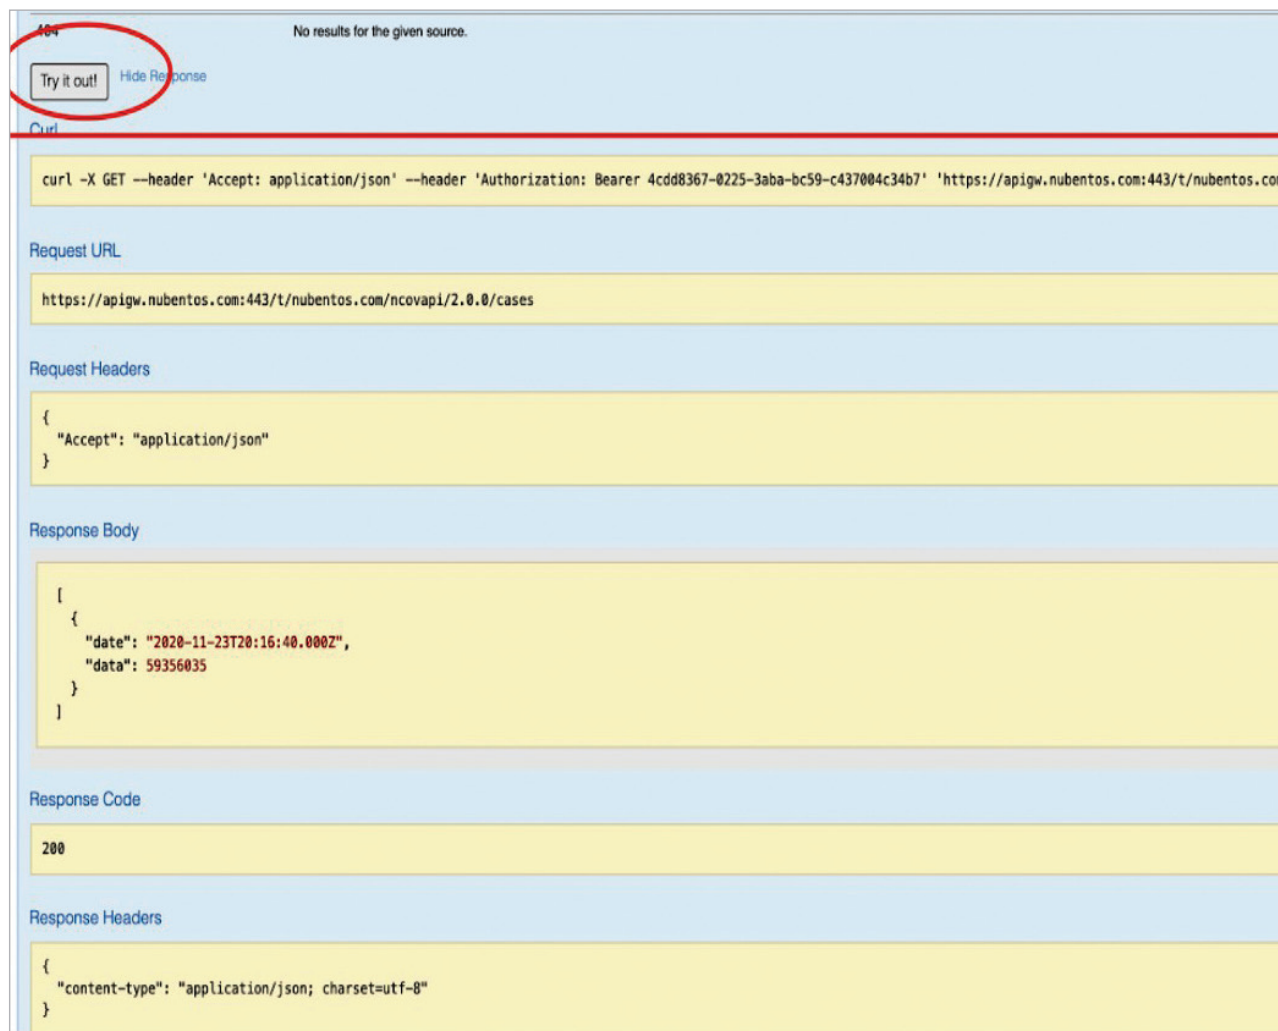

Figure 9: API-nCov19: Try out the endpoint to understand request/response json data format

HomePage. *ListView* country data provides a button which navigates to the *CountryDataPage*.

- **Widgets:**

- **covid_image.dart:** This file contains the stateful class (*stfl*) *CovidImage*, which provides a separate solution to put Covid precaution/safety images in the featured space. This widget uses *AnimatedContainer* along with *ClampingScrollPhysics* in *PageView* for a beautiful UI.
- **Data_row.dart:** This file contains a customisable widget, which is used multiple times and is written here to reuse the code with the same configurations.
