Portable projector with 360-degree surround sound launched in India

Anker, a reputed global manufacturer of electronic gadgets, has launched its latest portable projector – the Nebula Capsule. The projector comes with 360-degree surround sound and 5W speakers to produce an immersive audio experience.

The device enables screen mirroring via AirPlay and Miracast, and offers images as big as 254cm (100 inches) in size. It runs on Android 7.1 Nougat, which enables video streaming from any compatible app. DLP technology that uses IntelliBright algorithms delivers a picture quality of 100 ANSI lumens.

The company claims that pictures can be projected on to any surface like a ceiling, bed sheets, etc. The projector can run a large number of apps including Netflix and YouTube without connecting to a smartphone. Wireless casting support enables the device to mirror content directly from a mobile device.

With 0.5cm (0.2 inch) FWVGA (854 x 480 pixels) DLP display technology and an aspect ratio of 16:9, the projector has a lamp life of 30,000 hours. It comes with manual focus adjustment, auto keystone correction and supports front, rear, front ceiling and rear ceiling projection modes.

The Anker projector comes with a built-in 5,200mAh battery which offers four hours of non-stop video playback on a single charge and comes with Quick Charge support. It is available via online and retail stores.

An industrial switch from Digisol

Digisol, a subsidiary of Smartlink Network Systems and a leading provider of active networking products, has launched the DG-IS4506HPE switch, which is designed for industrial applications.

The switch is capable of operating reliably in extremely harsh environments due to its wide operating temperature range. It is designed with four 10/100/1000M PoE ports and two 1000M SFP ports to provide abundant and flexible connections.

The Digisol switch supports surge protection, ensuring system stability for greater user flexibility. It enables the user to configure port

settings, manage network performance and monitor LAN for critical issues.

The switch offers best-in-class performance and enables configuration, monitoring and management of industrial LANs to provide advanced performance and real-time deterministic network operation. It is designed to withstand extreme temperatures (-40° to 75°C), surges, vibration and shock typical of industrial automation, government, military, oil and gas environments. The switch is rugged and fan-less.

The Digisol DG-IS4506HPE feature-rich switch is available online and at retail stores with a limited lifetime warranty.
