

Synology releases high-end NAS solution

Price:
On request

Synology, the creator of network attached storage (NAS), IP surveillance solutions as well as network equipment, has released the DS1019+ in India. This five-bay desktop NAS scalable solution is perfect for small offices and IT enthusiasts.

With a compact chassis design, the device features a quad-core processor, 8GB memory and dual M.2 NVMe SSD slots. It allows a user to create SSD cache without occupying any drive trays, offers dual-channel 4K video transcoding capability and has a scalable storage design. All this makes it an ideal option for multimedia applications, suitable for ultra HD video streaming.

The device's scale-up design offers storage expansion up to 140TB with one expansion unit, making it useful for data backup, file sharing and recovery. It comes preloaded with dual channel 8GB memory and NVMe SSD cache support, and provides sufficient horsepower for I/O intensive applications.

The device runs on DiskStation Manager, an advanced and intuitive operating system with multiple applications offering good work productivity. The Synology DS1019+ disk station is available for purchase via both online and retail stores.

Address: Synology India, Bhandari House - 91, 208, Nehru Place, Delhi 110019

300Mbps Wi-Fi router from Tenda

Tenda, a leading supplier of networking devices and equipment, has introduced a networking device in India – the Tenda F6 Wi-Fi router. A blend of style and speed, the router ensures uninterrupted, high speed Internet connectivity, and is suitable for both home and office.

The device features a unique crater-like design and comes with a heat-sink and top vent, ensuring efficient heat management. It is equipped with four 5dBi high-gain omni-directional antennas, which the company claims provide superior network coverage, along with MIMO technology that allows better signal transmission.

As per the company's claims, the antennas are located such that they minimise signal interference.

The router follows the WPA-PSK/ WPA2-PSK security standard and comes embedded with a built-in firewall that requires no additional setup.

With universal signal amplification, the network coverage can be expanded by connecting two routers to a single network. The device offers a working frequency of 2.4GHz and supports the 802.11 b/g/n protocols; it comes with a Broadcom chip.

The Tenda F6 Wi-Fi router is available via online and retail stores at a reasonable price.

Address: Tenda India, 2nd Floor, 19, R.N. Mukherjee Road, Lal Bazaar, Kolkata, West Bengal 700001
