

“The pillars of open source are community, transparency and collaboration”

Ameeta Roy, director,
solution architecture at Red Hat India and South Asia

Open source software is the catalyst for most innovations happening in today's digital world. As technologies like artificial intelligence (AI), machine learning (ML), the Internet of Things (IoT) and blockchain become ubiquitous, the demand for open source solutions is expected to grow phenomenally in the near future.

Ameeta Roy, director, solution architecture at Red Hat India and South Asia, shares her thoughts on the trends, challenges and technologies in this domain with **Ankita K.S.** from the **EFY Group**. She also talks about the hiring trends, as well as Red Hat's developer and academic partnership programmes that help build a stronger community. Excerpts follow....
