

“The 2017 Linux Kernel Development Report ranks us among the top 5 organisations in the world, in terms of contributions to the Linux kernel”

Developing the most relevant solutions for its customers is of utmost importance to IBM's Linux Technology Center in India. This requires constant interaction and collaboration with them, in order to improve continuously and innovate constantly. In an exclusive chat, **Dipankar Sarma, distinguished engineer, Linux Technology Center - IBM India**, talks about the Center's role with respect to Linux and its impact on IBM Power Systems, among other things, with **Rahul Chopra, editorial director, EFY Group**.

Dipankar Sarma,
distinguished engineer,
Linux Technology Center-IBM India
