9. Red5

Red5 is an open source media server that supports all kinds of live streaming. The software has a flexible design and supports many plugins which enhance its capabilities. It's designed in Java and provides compatible services like Adobe Flash Media Server and Wowza Streaming Engine.

Apart from Flash, Red5 supports HLS, WebSockets and RTSP. It provides strong support for WebRTC to enable streaming in the browser without a plugin.

Technical features

- Easy to set up. Its simple user interface comes with stable streaming.
- Supports streaming of video and audio in formats like MP4, F4V, FLV, 3GP, MP3, M4A, AAC, etc.
- Strong plugin architecture.

Latest version: 1.0.7

Figure 10: Universal Media Server (UMS) GUI

10. Universal Media Server (UMS)

Universal Media Server is an open source and powerful media server providing a stable and reliable interface to end users. The software can be easily configured to run on any PC or NAS open source software with a simple series of steps. Universal Media Server has strong support from developers who keep it up-to-date with new features, while performing bug fixes. The program streams or transcodes video, audio and image formats with little or no configuration.

Universal Media Server is capable of serving videos, audio and images to any DLNA-capable device. It supports streaming to many devices including Sony PlayStation, Microsoft Xbox, TVs, smartphones (iPhone, Android, etc), Blu-ray players, and more.

Universal Media Server supports all major operating systems, with versions for Windows, Linux and Mac OS X.

It's powered by FFmpeg, MEncoder, tsMuxeR, MediaInfo, OpenSubtitles and more, which combine to offer support for a wide range of media formats.

Technical features

- Automatically scans all content on home networks.
- Support for third-party plugins to provide extra features.
- Universal Media Server allows end users to host an entire library of videos, music and pictures, and broadcast them conveniently to a wide variety of different devices.

Latest version: 8.0.0-a2
