

# Top Ten Android Tablets of 2018

Contrary to expectations, tablets are quite popular with a large segment of users. They are also great as gifts. However, deciding on a popular and feature-packed tablet to suit your pocket can be a chore. We present a selection of the top Android tablets of 2018 to save you the trouble of deciding on one.

**S**o what is the best or the ultimate Android tablet to buy right now? New devices are coming out almost every month, and it's quite challenging to even discover what is out there and decide on 'The Ultimate Value-for-Money Android Tablet'. Android

tablets make a great gift for children or grandparents. With the Android OS, they ensure seamless integration with the Google ecosystem. Currently, there are probably hundreds of tablets available on e-commerce shopping portals—some of them are overpriced, some offer poor

value for money, and some are really good; so it is somewhat cumbersome to determine the best tablet to grab.

In this article, the top Android tablets of 2018 are lined up, along with their technical specifications, pros and cons, to provide a one-stop guide to buyers.

Samsung  
Galaxy Tab S4

**1 Samsung Galaxy Tab S4** is the ultimate flagship 26.67cm tablet that is aimed at people who require a device lighter than an ultrabook but with a keyboard and pen. This tablet tries to push Android tablets to the next level with its two-in-one desktop-like software, and is preferred by business and enterprise customers who want to replace their laptops with tablets.

In 2018, Samsung upgraded the Galaxy Tab S series by altering the device's form factor, switching from the 4:3 to the 16:10 aspect ratio with a Super AMOLED display, which is 26.67cm in size with narrower bezels. The tablet is equipped with the Qualcomm Snapdragon 835 SoC to provide high system performance with 4GB RAM and a 7300mAh battery with DeX mode.

## Technical specifications

- *Dimensions (H x W x D; weight):* 249.3mm x 164.3mm x 7.1mm; 483g
