

Google Pixel Slate

4

Google Pixel Slate

Google Pixel Slate is an Android Mobile productivity device from Google, which combines the design and appeal of a flagship two-in-one tablet. Like Apple's iPad Pro and Microsoft's Surface Pro, the Pixel Slate is a tablet designed to pair with a keyboard to become more like a laptop. It relies on the Chrome OS.

On paper, the Pixel Slate looks like a capable product similar to the Pixel 3 smartphone. But in reality, it is just another tablet biting off more than it can chew. While it handles Web browsing just fine, its efficiency drops as soon as you exit its Google Chrome browser, its great ideas hamstrung both by Google's software decisions and a small platoon of bugs.

The Pixel Slate is a sleek-looking tablet, clearly designed to be used while connected to a keyboard case. The entire front is covered in a sheet of glass, while the rounded edges and flat back are aluminium. Both the front and rear cameras are 8MP and sit flush with the Slate's body. On either side of the display sits a front-facing speaker, perfect for blasting

audio right at your face instead of off to the side. In terms of performance, the cheapest Pixel Slate features a paltry 32GB of storage and an Intel Celeron processor.

Technical specifications

- **Dimensions (L x W x H; weight):** 202.04mm x 290.85mm x 7.0mm; 0.7kg
- **CPU:** 8th generation core m3/ i5 / i7 processor/Intel Celeron processor
- **Display:** 31.2cm molecular display with 3000 x 2000 resolution LTPS LCD with Corning Gorilla Glass 5
- **Camera:** 8MP f/1.9 front + rear camera with 1080p 30fps video recording capability
- **Memory:** 4GB, 8GB and 16GB
- **Connectivity:** Wi-Fi 802.11 a/b/g/n/ac, 2x2 MIMO, dual-band, 2-USB C for charging, 4K display output, Bluetooth 4.2
- **Sensors:** Fingerprint, 3-axis gyroscope/accelerometer
- **Speakers:** Dual front-firing speakers for surround sound, two microphones for noise cancellation
- **Battery:** 48WHr battery
- **Software:** Chrome OS

Pros: Vibrant display, loud speakers, good performance, responsive fingerprint sensor, support for Pixel Book Pen, long battery life

Cons: Expensive compared to competitors, pricey accessories, no headphone jack, no expandable storage

Royole FlexPai
smartphone-cum-tablet

5

Royole FlexPai

FlexPai is the world's first commercial foldable smartphone-cum-tablet with a flexible display. It is like any other phone with great style. When folded out the device offers a 19.8cm display, which sits firmly in the 'small tablet' territory, with a 1,920 x 1,440-pixel resolution. Folded up, the FlexPai suddenly delivers two displays — one with a 16:9 aspect ratio, and the other with an 18:9 aspect ratio. The FlexPai can automatically detect which display you're using, turning the other one off. It can be folded from 0 to 180 degrees.

The company, Royole Corporation, claims it can fold and unfold 200,000 times, which means you could perform the move 50 times every day for nearly 55 years. The screen itself is a 1,920 x 1,080 AMOLED display with 308ppi (pixels per inch).

Technical specifications

- **Dimensions (H x W x D; weight):** 134mm x 190.3mm x 7.6mm; 320g

- **CPU:** Qualcomm Snapdragon 8 series SoC octa-core 2.8GHz processor
- **Display:** 19.8cm diagonal flexible AMOLED at 1920 x 1440px resolution (expanded mode), with contrast ratio of 4:3 (expanded mode), 308 ppi
- **Camera:** 16MP (tele-photo) + 20MP (wide) f/1.8 with auto-focus, optical image stabiliser and Flash
- **Memory:** 6GB/8GB RAM + 128GB/256GB ROM with support for up to 256GB microSD card
- **Connectivity:** WLAN, WLAN-Hotspot, Bluetooth 5.1, dual band Wi-Fi, USB Type-C, VoLTE Support, 3.5mm audio port, GPS, A-GPS, BeiDou
- **Sensors:** Fingerprint scanner, ambient light, proximity, accelerometer, multi-axis gyroscope, compass, Hall effect, barometer
- **Speakers:** HD sound, loudspeaker
- **Battery:** Non-removable 3800mAh lithium-polymer
- **Software:** Android 9.0 Pie

Pros: The world's first foldable smartphone-cum-tablet, hardware options in abundance, bigger workspace, good and fast connectivity

Cons: Less battery backup, no NFC, camera quality not good, too expensive
