

Check the MAC address:

```
#ifconfig -a | grep HWaddr
```

Now put down/turn off the *eth0* by using the following command:

```
#ifconfig eth0 down
```

Next, let us set a new MAC address using the following command:

```
#ifconfig eth0 hw ether <New MAC Address>
```

Finally, bring back the Ethernet adaptor (*eth0*) by using the command given below:

```
#ifconfig eth0 up
```

Check the new MAC address again by using the following command:

```
#ifconfig -a | grep HWaddr
```

Awesome uses of Curl

Curl is a very useful command for developers working with Linux. It is a tool to transfer data from or to a server, using one of the supported protocols. The command is designed to work without user interaction. *curl* offers a busload of useful tricks like proxy support, user authentication, FTP upload, HTTP post, SSL connections, cookies, file transfer resume, Metalink, and more. Given below are a few of the uses and examples that can help you.

To get your current IP address, use the command:

```
$ curl curlmyip.net
```

To get the current weather conditions in your location, type:

```
$ curl wttr.in
```

To get the weather conditions at a specified location, give the command:

```
$ curl wttr.in/Norway
```

To get the exchange rate for cryptocurrencies, type:

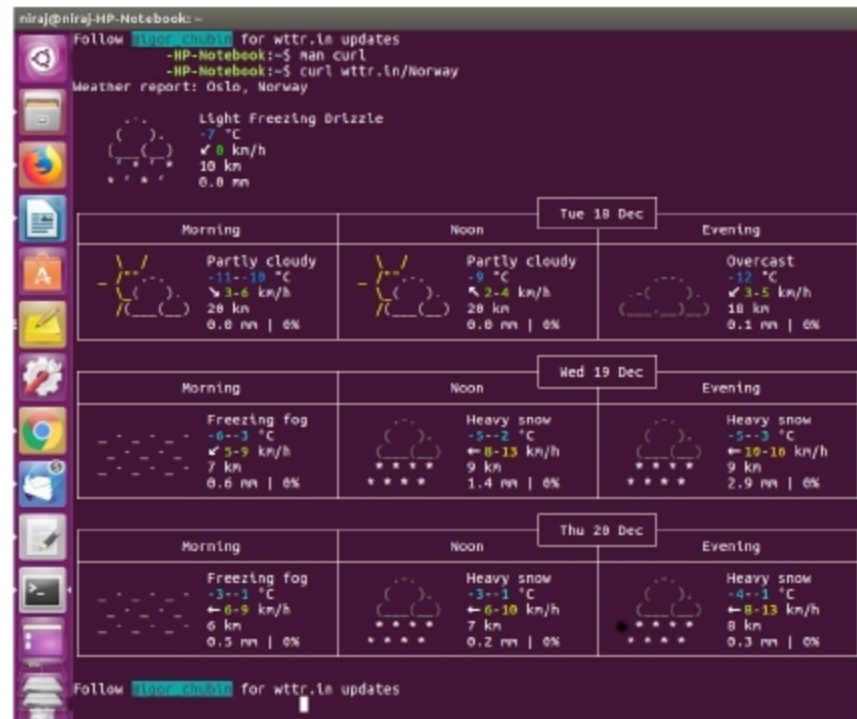

Figure 1: Output of *wttr.in*

```
$ curl rate.sx
```

You can even get the Internet speed with the following command:

```
$ curl -s https://raw.githubusercontent.com/sivel/speedtest-cli/master/speedtest.py | python -
```

```
Retrieving speedtest.net configuration...
Testing from Airtel Broadband (1xx.1xx.2x.3x)...
Retrieving speedtest.net server list...
Selecting best server based on ping...
Hosted by FusionNet (Noida) [0.00 km]: 20.844 ms
Testing download speed.....
Download: 37.02 Mbit/s
Testing upload speed.....
Upload: 9.30 Mbit/s
```

You can read the man pages to know more about the tool.

Share Your Open Source Recipes!

The joy of using open source software is in finding ways to get around problems—take them head on, defeat them! We invite you to share your tips and tricks with us for publication in *OSFY* so that they can reach a wider audience. Your tips could be related to administration, programming, troubleshooting or general tweaking. Submit them at www.opensourceforu.com. The sender of each published tip will get a T-shirt.
